

## **Onychomycosis (Fungal Nail Infections)**

**Clever Fungus Pythie Biodeur Nail** – A biological product suitable for care of toenails prone to fungal infections.

**Contents:** 3 x 3g effervescent tablets

**Application:** Wrap dressing around the toenails

### **Instructions for use**

1. Dissolve 1 effervescent tablet into 50ml (1 foot application) or 100ml (application to both feet) of lukewarm water (max 34°C) in a container large enough to soak dressings.  
**One tablet is effective for 2 applications i.e. if applying to 1 foot, 25ml is to be used for 1 dressing thus 25ml is remaining for the dressing the following day.**
2. Soak cotton wool/gauze in solution and fold and wrap the nails with the soaked dressing and ensure toenails are fully covered both on the top and bottom of the toe/s.
3. Place a plastic bag over the foot, cover with a sock and allow to work overnight.
4. Remove dressing in the morning & allow feet to dry naturally.
5. Repeat steps 2 – 4 the following day.
6. Repeat steps 1 to 5 in 2 – 4 weeks.
7. After another 2 – 4 weeks, repeat steps 1 to 5.

**Note:** Remaining solution can be used to wipe the inside of your shoes & allow to dry. Do not use any other shoe disinfections. During the application do not use any other disinfection preparations except common hygiene. Do not remove nail-polish before application and do not apply nail-polish 24 hours after application.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Sorbitol, Citric acid, Sodium Bicarbonate, Silica, Panicum miliaceum, Pythium oligandrum, PEG-6000, Sodium Carbonate.*

## **Foot Mycoses**

**Clever Fungus Pythie Biodeur Prevent** – A biological product suitable for care about skin on feet prone to fungal infections, for care about feet prone to odour & sweating.

**Contents:** 3 x 3g effervescent tablets

**Application:** Foot bath

### **Instructions for Use**

1. Dissolve 1 effervescent tablet in 2 litres of lukewarm water (max 34°C) in a foot bath or washbasin.
2. Soak feet for between 40 – 60 min (the longer the feet are soaked the better the result).
3. Allow feet to dry naturally.
4. Keep the remaining solution for the following day and repeat steps 2 – 3. Discard the remaining solution after both applications have been completed.
5. Repeat steps 1 – 5 a week later.
6. Repeat steps 1 – 5 after another week.
7. The best time to perform applications is before you go to bed.

Example of applications: MON and TUE, next week MON and TUE, next week MON and TUE.

**Note:** Soak a cotton wool ball or gauze & wipe the inside of your shoes thoroughly & allow to dry. Do not use any other disinfection means within 12 hours after application except the common personal hygiene.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Citric acid, Sodium Bicarbonate, Sorbitol, Silica, Panicum miliaceum, Pythium oligandrum, PEG-6000, Sodium Carbonate.*

## **BIODEUR**

Biological product suitable for care about nails and skin on feet prone to fungal infections, for care about feet prone to odour and sweating.

**Contents:** 1 x 1g or 3 x 1g ampoule

**Applications:** Foot bath or wrap dressings

### **Instructions for use:**

#### **Foot bath:**

1. Pour lukewarm water (max 34°C) into the ampoule, cover and shake thoroughly. Pour the suspension into 2 – 3 litres of lukewarm water and mix and dilute thoroughly.
2. Soak feet for 20 – 40 min (the longer the feet are soaked the better result).
3. Do not towel dry – allow feet to dry naturally.
4. Keep the remaining solution for the following day and add 1 litre of lukewarm water and repeat steps 2 – 3 and then discard remaining solution.
5. After 6 days, repeat steps 1 – 4.
6. After another 6 days, repeat steps 1 – 4.

The best is to perform application on evenings before going to bed.

Example of applications: MON and TUE, next week MON and TUE, after another week MON and TUE

**Note:** Use the solution prepared for bath also for wiping the inside of your shoes, do not use any other disinfection means for shoes. Do not use any other means for disinfection of feet within 12 hours of individual applications except the common hygiene.

#### **Wrap dressings of nails:**

1. Pour lukewarm water (max 34°C) into the ampoule, cover and shake thoroughly. Pour the suspension into 50ml (1 foot application) or 100ml (application to both feet) of lukewarm water in a container large enough to soak dressings and mix and dilute thoroughly.
2. Soak cotton wool/gauze in solution (25 ml per one foot) and cover and wrap the nails with the soaked dressing. Ensure that the toenails are fully covered both on the top and bottom of the toe/s.
3. Place a plastic bag over the foot, cover with a sock and allow to work overnight.
4. Remove dressing in the morning & allow feet to dry naturally.
5. Repeat steps 2 – 4 the following day using the rest of the solution.
6. Repeat steps 1 to 5 after 2 – 4 weeks.
7. Repeat steps 1 to 5 after another 2 – 4 weeks.

Example of applications: MON and TUE, in 2 – 4 weeks MON and TUE, in another 2 – 4 weeks MON and TUE.

**Note:** Use the solution prepared for bath also for wiping the inside of your shoes, do not use any other disinfection means for shoes. Do not use any other means for disinfection of feet within 12 hours of individual applications except the common hygiene. Do not remove nail polish before application and do not apply nail polish within 24 hours after application.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Panicum miliaceum, Pythium oligandrum.*

### **Clever Fungus Pythie Biodeur Prevent Foot Powder**

Product suitable for care about feet prone to odour, sweating and fungal infections.

**Contents:** 4g

**Application:** application onto feet and spraying of footwear

#### **Instructions for use:**

Spray the original composition of microflora onto your feet and into the footwear by pressing the ampoule. Repeat again when needed.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Panicum miliaceum, Pythium oligandrum, Parfume, Alpha-isomethyl-ionone, Benzyl benzoate, Benzyl salicylate, D-limonene, Buthylphenylmethylpropional, Geraniol.*

### **Fingernail Mycoses**

#### **BIO BLOCK**

Biological product suitable for fingernails prone to fungal infections.

**Contents:** 3 x 1g + rubber finger applicator

**Applications:** Fingernail wraps

#### **Instructions for use:**

1. Pour contents of one ampoule into the rubber finger applicator.
2. Wet the affected finger in lukewarm water and apply the rubber finger.
3. Leave on for at least 2 hours to allow preparation to work (if any part of the rubber applicator becomes twisted then remove that section of the applicator only).
4. Repeat steps 1 – 3 the following day with a new ampoule.
5. Repeat steps 1 – 3 again in 1 month.
6. If needed, repeat the steps 1 – 3 again 1 month later.

**Note:** Do not use any other disinfection means for skin or nails during application. Do not remove nail polish before applications and do not apply nail polish within 24 hours after application. When using cleaning and disinfection means in household wear protective gloves.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Panicum miliaceum, Pythium oligandrum, Aroma, Eugenol.*

### **Periodontitis**

#### **Clever Fungus PYTHIE Bio Plus**

Rinsing mouthwash that contains a unique composition of microflora, which is favorable in the oral cavity with the tendency to inflammation of the gums. It is a suitable complement to the care of teeth and gums, freshens breath.

**Contents:** 5 x 3g (effervescent tablets)

**Application:** Mouth wash

**Instructions for use:**

1. Dissolve 1 effervescent tablet into 100 – 200ml of lukewarm water (max 34°C) in a glass. Allow solution to activate for at least 20 min once tablet has dissolved. NB. A cloudy sediment that will appear at the bottom of the solution is not a problem.
2. Rinse your mouth with the prepared solution for at least one minute and spit out. Repeat until the solution is used, the total time of night mouth wash should be at least 5 minutes. After using mouthwash rinse the mouth with water, and do not eat or drink for at least 30 min.
3. Use at night before going to bed 30 minutes after tooth brushing as a supplement to regular oral care. The solution can be prepared in the morning, rinse during the day as required and the remainder used to rinse the evening.
4. Repeat steps 1 – 3 the following day with the second tablet and again with the third tablet the following day.
5. The remaining 2 tablets may be used as needed during the following days or with some delay.

**Note:** This preparation does not replace regular oral hygiene. During applications and 24 before and after the application do not use any other mouthwash and avoid alcohol consumption. Use the solution within 24 hours after preparation.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Citric acid, Sodium bicarbonate, Sorbitol, Silica, Panicum miliaceum, Pythium oligandrum, PEG-6000, Sodium carbonate, Aroma, D-limonene.*

**BIO PLUS**

Rinsing mouthwash that contains a unique composition of microflora, which is favorable in the oral cavity with the tendency to inflammation of the gums. It is a suitable complement to the care of teeth and gums, freshens breath.

**Contents:** 5 x 1g

**Application:** Mouth wash

**Instructions for use:**

1. Dissolve contents of the sachet into 100ml of lukewarm water (max 34°C) in a glass. Allow solution to activate for at least 30 min once powder has dissolved. A cloudy sediment that will appear at the bottom of the glass is not a problem.
2. Rinse your mouth with the prepared solution for at least one minute and spit out. Repeat until the solution is used, the total time of night mouth wash should be at least 5 minutes. After using mouthwash rinse the mouth with water, and do not eat or drink for at least 30 min.
3. Use at night before going to bed 30 minutes after tooth brushing as a supplement to regular oral care. The solution can be prepared in the morning, rinse during the day as required and the remainder used to rinse the evening.
4. Repeat steps 1 – 3 the following day with the second sachet and again with the third sachet the following day.
5. The remaining 2 sachets may be used as needed during the following days or with some delay.

**Note:** This preparation does not replace regular oral hygiene. During applications and 24 before and after the application do not use any other mouthwash and avoid alcohol consumption. Use the solution within 24 hours after preparation.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Panicum miliaceum, Pythium oligandrum, Aroma, D-limonene.*

## **Psoriasis and Dermatitis**

### **BIODELTA**

Biological product suitable for the care of dry skin and those prone to psoriasis and atopic eczema. Relaxing bath containing microflora *Pythium oligandrum*.

**Contents:** 15 x 8g

**Applications:** Cycle of baths or wrap dressings

### **Instructions for use:**

#### **Baths:**

1. Pour a small amount of lukewarm water (max 34°C) into the bottle containing solution and shake well to mix.
2. Allow mixed solution to activate for 8 – 12 hours at room temperature.
3. Once activated, run a bath and pour whole contents of bottle into bath water.
4. Bathe for at least 40 – 60 min in the solution but can bathe for longer if tolerated.
5. Do not towel dry and allow skin to dry naturally.
6. Repeat steps 1 – 5 over 5 consecutive days in total (5 bottles used in total).
7. Repeat the 5 days cycle after one month.
8. Repeat the 5 days cycle after another month.

**Note:** During the five-day cycle and then another five days thereafter, do not use any other skin care products. In case of feelings of stressed or dried skin, lubricate it about an hour after application with non-disinfecting cream without preservatives and without urea.

#### **Wrap Dressings:**

1. Pour a small amount of lukewarm water (max 34°C) into the bottle containing solution and shake well to mix.
2. Allow mixed solution to activate for 8 – 12 hours at room temperature.
3. Dilute bottle contents into 4 litres of lukewarm water and soak gauze dressings in solution. Wrap dressings onto affected areas and allow at least 1 hour before removing dressings and allow skin to dry naturally.
4. Repeat steps 1 – 3 over 4 consecutive days (5 bottles in total).
5. Repeat steps 1 – 4 the following month and again in 1 months time (3 consecutive months in total).

**Note:** During the five-day cycle and then another five days thereafter, do not use any other skin care products. In case of feelings of stressed or dried skin, lubricate it about an hour after application with non-disinfecting cream without preservatives and without urea.

#### **Scalp Wash:**

1. Pour a small amount of lukewarm water (max 34°C) into the bottle containing solution and shake well to mix.
2. Allow mixed solution to activate for 8 – 12 hours at room temperature.
3. Dilute bottle contents into 4 litres of lukewarm water (max 34°C) and wash/soak scalp every 5 min to ensure head is kept moist over a 20 min period. Alternatively, you can soak a towel into the solution and wrap it over your head as a turban. Leave the towel on for 1 hour.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Panicum miliaceum, Pythium oligandrum.*

### **Biogama**

Product containing *Pythium oligandrum* microflora suitable for skin prone to fungal infections and for care about dry skin associated with psoriasis.

**Contents:** 50ml

**Application:** Ointment

#### **Instructions for use:**

##### **For local applications**

Apply the cream once daily over 3 consecutive days, repeat again in 1 month.

##### **When used in conjunction with Biodelta baths:**

Apply to skin once daily in between the five days cycles of baths with Biodelta.

**Note:** Do not wash skin for at least two hours after a single use and do not use any other skin care products. If feelings of stress or skin dryness occur, lubricate it about an hour after application with non-disinfection cream without preservatives and without urea.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Petrolatum, Silica, Panicum miliaceum, Pythium oligandrum.*

### **Pythie Biogama fine Ointment**

Product suitable for the care of dry skin prone to psoriasis and atopic eczema.

**Contents:** 50ml

**Application:** Ointment

#### **Instructions for use:**

Apply ointment to affected skin areas at least twice daily. During applications do not use any other skin products except products containing *Pythium oligandrum*.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Olea europaea fruit oil, Butyrospermum parkii butter, Glyceryl stearate, Silica, Panicum miliaceum, Pythium oligandrum, Tocopherol, Linalool (Lavandula angustifolia oil).*

### **Pythie Biogama Oil**

Product suitable for use on skin dry for those prone to psoriasis and atopic eczema.

**Contents:** 100ml

**Application:** Oil bath

#### **Instructions for use**

Add 1 teaspoon of oil to a lukewarm (max 34°C) bath and mix thoroughly. During applications do not use any other skin products except products containing *Pythium oligandrum*.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Olea europaea fruit oil, Silica, Pythium oligandrum, Panicum miliaceum, Tocopherol, Linalool (Lavandula angustifolia oil).*

## **Diabetic**

### **Pythie Diabetic Oil**

Product suitable for care of dry skin associated with diabetes prone to fungal infections.

**Contents:** 100ml

**Applications:** Oil bath

#### **Instructions for use:**

Add 1 teaspoon of oil to a lukewarm (max 34°C) bath and mix thoroughly. During applications do not use any other skin products except products containing Pythium oligandrum.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Prunus amygdalus dulcis oil, Silica, Pythium oligandrum, Panicum miliaceum, Hippophae rhamnoides fruit extract, Rosmarinus officinalis leaf extract, Tocopherol, Cymbopogon winterianus herb oil.*

### **Pythie Diabetic Ointment with Hippophae Rhamnoides (Sea-Buckthorn)**

Product suitable for dry skin associated with diabetes prone to fungal infections

**Contents:** 50ml

**Application:** Ointment

#### **Instructions for use:**

Apply ointment to affected skin areas at least twice daily. During applications do not use any other skin products except products containing Pythium oligandrum.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Olea europaea fruit oil, Butyrospermum parkii butter, Glyceryl stearate, Silica, Hippophae rhamnoides fruit extract, Rosmarinus officinalis leaf extract, Panicum miliaceum, Pythium oligandrum, Tocopherol, Cymbopogon winterianus herb oil, Citronellol, Geraniol, D-Limonene.*

## **Paediatric**

### **Pythie Baby Oil**

Product suitable for care about child skin prone to atopic eczema.

**Contents:** 100ml

**Application:** Oil bath

**Instructions for use:**

Add 1 teaspoon of oil to a lukewarm (max 34°C) bath and mix thoroughly. During applications do not use any other skin products except products containing *Pythium oligandrum*.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Olea europaea fruit oil, Silica, Pythium oligandrum, Panicum miliaceum, Tocopherol, Eucalyptus globulus leaf oil.*

**Pythie Baby Ointment For Sore Skin**

Product suitable for care about the delicate skin of children. Specially suitable for care about irritated and sore skin.

**Contents:** 50ml

**Application:** Ointment

**Instructions for use:**

Apply ointment to affected skin areas at least twice daily. During applications do not use any other skin products except products containing *Pythium oligandrum*.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Olea europaea fruit oil, Butyrospermum parkii butter, Fish glycerides, Glyceryl stearate, Hippophae rhamnoides fruit extract, Rosmarinus officinalis leaf extract, Silica, Pythium oligandrum, Panicum miliaceum, Tocopherol.*

**Feminine Hygiene****Feel Fresh – Cosmetic Feminine Bath**

The product containing microflora *Pythium oligandrum* designed for skin prone to dampness and skin sites susceptible to the occurrence of yeast.

**Contents:** 5 x 2g

**Application:** Bath

**Instructions for use:**

1. Pour a small amount of lukewarm water into bottle containing solution and shake thoroughly until well diluted. Allow 30 min for activation of the microflora.
2. Fill a small bath/basin with lukewarm (max 34°C) water. Pour contents of bottle into the prepared bath.
3. Bathe for at least 30 – 60 min or longer if tolerated (sit in the bath/basin).
4. Repeat the bath as needed, ideally during the three consecutive days.

**Note:** Within 24 hours before and after each bath do not use any other local skin care products. In case of feelings of stressed or dried skin, lubricate it about an hour after application with non-disinfecting cream without preservatives and without urea.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Pythium oligandrum, Panicum miliaceum, Aroma.*

## **Decubitus/Venous Ulcers**

### **BIOMYCOSIN**

A biological product containing *Pythium oligandrum* suitable for care about skin and for adjustment of physiological skin microflora during the healing of damaged skin.

**Contents:** 10g

**Application:** Wound dressing/flush

#### **Instructions for use:**

##### **Wound flush:**

1. Pour contents of the bottle into 250ml of normal saline (purchased from the pharmacy) and shake thoroughly to mix. Allow solution to activate for approximately 5 minutes.
2. Draw up 60ml total of the above prepared solution (without sediment) and mix into 1 litre of water which will be used for wound irrigation (use a container that has no chemical residues such as stainless steel or glass/porcelain).
3. Gently clean the affected area/s thoroughly or draw up solution into a syringe and flush/irrigate the affected area thoroughly. Do not towel dry, allow to dry naturally.
4. Discard the bath solution while keeping the solution in saline for further use.
5. Apply during two consecutive days during the morning and evening toilet (4 applications).
6. In case of need repeat the procedure using a new packing.

##### **Wound dressings:**

1. Pour contents of the bottle into 250ml of normal saline (purchased from the pharmacy) and shake thoroughly to mix. Allow solution to activate for approximately 5 minutes.
2. Post activation as per Step 1 above, soak gauze dressing in solution and wrap around the edge of the wound and leave on overnight.
3. Keep remaining solution at room temperature until the following day and repeat the whole process again.
4. Discard remaining solution.
5. Repeat steps 1 – 3 with a new package of the product as required.

**Note:** Within 12 hours of individual baths, do not use any other disinfectants for skin care. Use a container for rinsing free of any chemicals.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Pythium oligandrum, Panicum miliaceum.*

## Organic Products

### Clever Fungus Pythie Bio Biodeur

Biological product suitable for care about skin on feet prone to fungal infections as well as feet prone to odour and sweating.

**Contents:** 3 x 5g

**Applications:** Foot bath or wrap dressings

#### Instructions for use:

##### Foot bath:

1. Pour lukewarm water (max 34°C) into the ampoule, cover and shake thoroughly. Pour the suspension into 2 – 3 litres of lukewarm water and mix and dilute thoroughly.
2. Soak feet for 20 – 40 min (the longer the feet are soaked the better result).
3. Do not towel dry – allow feet to dry naturally.
4. Keep the remaining solution for the following day and add 1 litre of lukewarm water and repeat steps 2 – 3 and then discard remaining solution.
5. 6 days, repeat steps 1 – 4.
6. After another 6 days, repeat steps 1 – 4.

The best is to perform application on evenings before going to bed.

Example of applications: MON and TUE, next week MON and TUE, after another week MON and TUE

**Note:** Use the solution prepared for bath also for wiping the inside of your shoes, do not use any other disinfection means for shoes. Do not use any other means for disinfection of feet within 12 hours of individual applications except the common hygiene.

##### Wrap dressings of nails:

8. Pour lukewarm water (max 34°C) into the ampoule, cover and shake thoroughly. Pour the suspension into 50ml (1 foot application) or 100ml (application to both feet) of lukewarm water in a container large enough to soak dressings and mix and dilute thoroughly.
9. Soak cotton wool/gauze in solution (25 ml per one foot) and cover and wrap the nails with the soaked dressing. Ensure that the toenails are fully covered both on the top and bottom of the toe/s.
10. Place a plastic bag over the foot, cover with a sock and allow to work overnight.
11. Remove dressing in the morning & allow feet to dry naturally.
12. Repeat steps 2 – 4 the following day using the rest of the solution.
13. Repeat steps 1 to 5 after 2 – 4 weeks.
14. Repeat steps 1 to 5 after another 2 – 4 weeks.

Example of applications: MON and TUE, in 2 – 4 weeks MON and TUE, in another 2 – 4 weeks MON and TUE.

**Note:** Use the solution prepared for bath also for wiping the inside of your shoes, do not use any other disinfection means for shoes. Do not use any other means for disinfection of feet within 12 hours of individual applications except the common hygiene. Do not remove nail polish before application and do not apply nail polish within 24 hours after application.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Silica, Pythium oligandrum, Zea mays.*

**Clever Fungus Pythie Bio Biogama**

Organic product suitable for use for skin prone to psoriasis and atopic eczema.

**Contents:** 50ml

**Application:** Ointment

**Instructions for use:**

Apply ointment to affected skin areas at least twice daily. During applications do not use any other skin products except products containing *Pythium oligandrum*.

**Warning:** Keep out of reach of children. Not for internal use.

**Storage:** Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients:** *Butyrospermum parkii* butter, *Helianthus annus* seed oil, *Silica*, *Cera alba*, *Pythium oligandrum*, *Zea mays*.

### **BIO plus forte - mouthwash concentrate**

Mouthwash concentrate with the microorganism *Pythium oligandrum*, which has a beneficial effect in the oral cavity when gums are prone to irritation and tartar formation.

It is a suitable supplement in dental and gum care, refreshes the breath.

**Package contents:** 10 ml.

#### **Instructions for use:**

1. Fill a container (e.g. a glass) with 0.1 litres of water, add five drops of Bio plus forte and stir the solution.
2. Rinse your mouth thoroughly with the solution. Spit out the remaining contents in the mouth into the sink.
3. **After use, do not rinse your mouth with water and do not eat or drink for the next 30 minutes.**
4. Rinse in the evening before bedtime, 30 minutes after brushing your teeth as part of your regular oral care routine. The solution can be prepared in the morning, rinsed out during the day as needed, and the leftover solution used for evening rinses before bedtime.
5. Rinse regularly with a new solution prepared as described in point 1. for at least 10 consecutive days.

#### **Warning:**

Rinses are not a substitute for regular oral hygiene. Do not use any other mouthwash during application and between 24 hours before and 24 hours after application.

Do not drink alcohol at the same time as rinses.

Use the solution within 24 hours of preparation.

Shake before use!

Not for internal use. Keep out of reach of children.

**Storage.** : Store in dry conditions at room temperature (15 – 25°C) and relative humidity below 40 %.

**Ingredients** :Helianthus Annuus Seed Oil, Zea mays starch, *Pythium oligandrum*, Tocopherol natural Sage Oil Dalmatia

### **BIODEUR FOOT OIL**

A certified organic product

Oil based Organic product suitable for softening hard heels or peeling skin on the soles of feet. Helps reduce odour and sweating of feet

**Package contents:** 50 ml.

**Application:** for feet

**Directions for use:**

**Shake the product before use.**

Apply to heel, sole or midfoot and spread. Allow the product to moisten the skin naturally.

Apply once a day for at least five days. Repeat the five-day application as needed.

When applying the product, do not use any other treatment products except those with Pythium oligandrum.

**Warning** Keep out of reach of children. Not for internal use.

**Storage:** Store the product in a dry place at room temperature 15-25 °C and relative humidity up to 40 %.

**Ingredients:** Olea europaea fruit Oil, Zea mays starch, Pythium oligandrum, Tocopherol natural, Helianthus annuus seed Oil

### **BIO Biodeur nail oil**

Organic product suitable for fingernails and toenails prone to fungal infections and problematic nails. Reduces dryness of nails, promotes their growth, helps reduce nail thickening and chipping.

**Package contents:** 10 ml.

**Application:** nails

**Directions for use:**

1. Shake the product before application.

2. Apply once a day for at least ten days in a row. Repeat the 10-day application after one month and then as needed.

Do not use any other nail care products at the same time, except those with Pythium oligandrum.

The product can also be used on painted nails.

**Warning.** Keep out of reach of children.

**Storage:** Store the product in a dry place at room temperature 15-25 °C and relative humidity up to 40 %.

**Ingredients:** Olea europaea fruit Oil, Zea mays starch, Pythium oligandrum, Tocopherol natural, Helianthus annuus seed Oil

A certified organic product

Oil for intimate hygiene with *Pythium oligandrum* microflora. It is intended for gentle cleansing of the external genitalia, moisturizing the skin and for areas prone to inflammation. It soothes the skin and relieves itching of the external genital organs.

**Package contents:** 10 ml.

**Directions for use:**

- 1.Shake the contents of the bottle.
- 2.Apply the oil to moistened skin.
- 3.Use as needed 1-2 times a day, about 5 drops preferably ten days in a row.

**Warning:** Do not use any other products, except for routine hygiene products, for 12 hours before and after application.  
Keep out of reach of children. Not for internal use.

**Storage:** Store the product in a dry place at room temperature 15-25 °C and relative humidity up to 40 %.

**Ingredients:** Helianthus Annuus Seed Oil, Prunus Amygdalus Dulcis Oil , Zea mays starch, *Pythium oligandrum*, Tocopherol natural

### **BIO Pythie ear cleaner**

Product for gentle cleaning of the outer part of the ear/earlobe. Dissolves impurities. Helps protect against colonisation of the outer part of the ear by micro-organisms that can be a source of health problems. Relieves irritation. Moisturises dry skin.

**Package contents:** 10 ml.

**Application:** apply a sufficient amount of the product on a cotton swab or gauze. If you experience pain in the ear, a feeling of pressure or humming, do not underestimate these symptoms and seek medical attention.

**Directions for use:**

1. Shake the contents of the bottle.
2. Apply a sufficient amount of the product to a cotton swab or gauze and wipe the outer part of the ear. Repeat if necessary.
3. Use 1 time a weekly.

Note: Do not use other products, except for routine hygiene products, for 12 hours before and after application.

Note: Keep out of reach of children. Not for internal use.

Do not use in case of damage to the eardrum or diseases of the auditory organ.

Storage: Store the product in a dry, dark place at room temperature.

Ingredients: Olea europaea fruit Oil, Helianthus annuus seed Oil, Zea mays starch, *Pythium oligandrum*, Tocopherol natural,
