

Smart Fungus *Pythium oligandrum*

Living Culture:
Dormant oospores activate only upon contact with moisture.

Targeted Predator:
This natural organism consumes pathogens and naturally dies off once cleared.

Global Patent:
Sole owners of the global patent for this biotechnology.

Key product benefits

Pure BioTech:
A natural, chemical-free solution, no overdosing, no side effects.

Ultimate Safety:
Even for children, elderly users, and during pregnancy.

Painless & Proven:
Gentle application with long-term effect and zero microbial resistance.

Tinea pedis

Trichophyton rubrum

After two months

After nine months - negative microscopic preparation and culture.

biodeur.lab

„when biotechnology meets self-care“

Transforming insecurities with an active microorganism.

Revolutionary 3-STEP PROTOCOL

1

RESTORATION

Intensive initial care to eliminate active pathogens

2

PROTECT

Daily supportive care to maximize results

3

FOOTWEAR PROTECTION

Essential complementary care for footwear, where pathogens persist.

Biotechnology is the future of self-care.

The ultimate care protocol for feet, nails, fingernail and footwear.

FOOT CARE PROTOCOL

1

FOOT BATH

Intensive Myco-Relief.
A powerful therapeutic soak that rapidly clears severe mycosis, deeply sanitizes, and neutralizes foul odours caused by heavy sweating. This is the restorative first step.

Intensive Restoration

2

FOOT OIL

Post-Rescue or Repair as itself. This concentrated biological oil accelerates the natural healing cycle, instantly softening calloused heels and reducing peeling, leaving feet visibly smoother and deeply nourished.

Daily care

3

SHOE POWDER

Odor & Re-infection Block.
The essential, yet often overlooked defense against fungal issues on the feet. Its potent action neutralizes bacteria and spores hidden in footwear, permanently breaking the cycle of recurrence for guaranteed, lasting results.

Footwear protection

FINGERNAIL CARE PROTOCOL

1

FINGERNAIL COT

Nail Bed Revival.
Intensive, finger cot for precise cuticle care and restoration of the nail bed after damage from fungal issues or harsh cosmetic procedures. *The first step to elegant hands.*

Intensive Restoration

2

FINGERNAIL BALM

Luxury Daily Defense.
The new cream-based product for pleasant, daily application. Continually hydrates and protects the hand and nail from external aggression, supporting the wrap's effects.

Fingernail protection

NAIL CARE PROTOCOL

1

NAIL TABLETS

Overnight Matrix Soak.
An intensive effervescent treatment that harnesses *Pythium Oligandrum* to act overnight, deeply supporting the natural regeneration and strengthening of the nail matrix and surrounding skin prone to fungus.

Intensive Restoration

2

NAIL OIL

Growth Accelerator.
Concentrated oil applied daily to promote healthy nail matrix growth, combat thickening and brittleness, and reduce splitting/dryness. *Continues the restorative cycle.*

Daily care

3

SHOE POWDER

Odor & Re-infection Block.
The essential, yet often overlooked defense against fungal issues on the feet. Its potent action neutralizes bacteria and spores hidden in footwear, permanently breaking the cycle of recurrence for guaranteed, lasting results.

Footwear protection

1

NAIL WRAP

Myco-Disease Cleanser.
Intensive, deep-penetrating wrap for severe toenail issues and putrefactive diseases. Clears the nail bed to create a foundation for new, healthy growth.

Intensive Restoration

Who are the products for:

Thanks to their simple use and gentle technology

Professionals	End consumers
Podiatrists	Pharmacies
Dermatologists	Cosmetic stores
Beauty salons	E-shops / online stores
Pedicurists and Manicurists
