CEO Message

권종욱 | CEO

Jong Wook Kwon

Founder & CEO of Maypharm Co., Ltd

Welcome to Maypharm Co., Ltd.

Since our founding in 2009, Maypharm has been committed to becoming a global leader in the dermatological and medical aesthetics industry. Our vision is to rejuvenate and elevate skin health through innovative and effective solutions.

In just over a decade, we have become a prominent force in Korea's medical aesthetics market, reflecting our dedication to quality, safety, and customer satisfaction. Guided by **Integrity**, we prioritize ethical decisions and always act in the best interest of our customers and partners. We embrace an open **Mindset**, fostering innovation through honest communication and collaboration. With **Consideration** at the core of our business, we handle situations with empathy and fairness, ensuring that all stakeholders feel valued.

Our **Craftsmanship** is evident in our diverse range of high-quality products, including Skin Boosters, Dermal Fillers, and Botulinum Toxin, all developed to meet the strict standards of the Korean Food and Drug Administration (KFDA).

Maypharm holds prestigious certifications, including CE and CPNP, among other global recognitions, reflecting our strong commitment to maintaining the highest standards of quality and safety on a global scale.

At Maypharm, we believe in **Mutual Growth**. We pursue not only the benefit of the service provider but also the satisfaction of the buyer and consumer. This philosophy has enabled us to build strong global partnerships and deliver superior products and services. Our revenue has consistently doubled each year, reflecting the improved quality of our sales. In 2023, we achieved a revenue milestone of 50 million USD, highlighting our sustained growth and the trust our customers place in us. With a robust global presence and a commitment to continuous innovation, Maypharm is well-positioned for ongoing success.

Thank you for choosing us as your trusted partner in medical aesthetics.

METOX 100U

Proven Efficacy & Safety

Clinically proven to be safe and effective for improving glabellar wrinkles, it has become highly popular in the Middle East, Europe, and numerous international markets.

Vacuum Dehydration Method

In comparison with other brands, Metox is made with the help of upgraded technique, which involves removing moisture and other impurities in a controlled environment, resulting in a more stable product. As a result, there is almost no powder residue left on the bottom of every vial. It minimizes denaturalization such as foam or molecular breakage when diluted.

Consistency

Vacuum drying allows for more precise control over the drying process, leading to a consistent and uniform quality product. This consistency is essential.

Before & After

METOX 200U

Ease of Handling

Vacuum-dried botulinum toxin is generally easier to handle and reconstitute, making it more convenient for healthcare professionals during preparation and administration. This ease of use can contribute to improved patient experiences and more accurate injections.

METOX 200Units

Metox 200units is a revolutionary product formulated with Botulinum Toxin Type A, meticulously crafted to address dynamic wrinkles and fine lines effectively. Engineered to deliver unparalleled results, METOX 200units offers a rejuvenating experience that restores youthful vibrance to your skin.

Dosage Form

Freeze-dried white powder for reconstruction with sterile, preservative-free 0.9% sodium chloride solution

Treatment Areas

FACE

BODY

Dilution Table

100 Units

Dilution added Sterile 0.9% saline	Resulting dose Units per 0.1mL
1.0mL	10.0U
2.0mL	5.0U
4.0mL	2.5U
8.0mL	1.25U

200 Units

Dilution added Sterile 0.9% saline	Resulting dose Units per 0.1mL
1.0mL	20.0U
2.0mL	10.0U
4.0mL	5.0U
8.0mL	2.5U

Effect

Temporary improvement of moderate to severe wrinkle lines (such as glabellar lines) in adult patients.

Duration

5-7 months

Storage method

Refrigeration (2-8°C)

To prevent bacterial contamination, the interior of the refrigerator should be kept sterile, and the vials clean.

Treatment Areas

Active ingredients

- Clostridium Botulinum toxin A 100 units
- Human Serum Albumin 0.5mg
- Sodium Chloride 0.8mg

Appearance

A white or light yellow lyophilizate contained in a colorless and transparent vial and is a transparent solution when dissolved in saline.

Mechanism

Temporary improvement of moderate to severe wrinkle lines (such as glabellar lines) in adult patients.

Package

KAMOMIS

Features that make Sedy Fill unique

- **Optimal gel strength** that can be adjusted according to the patient's needs
- **Excellent malleability** for easier modeling
- **Combats cellulite** and uneven skin surface after liposuction procedures
- **Strong viscosity** and cohesiveness (migration resistance)
- Performs delicate **intimate rejuvenation and correction**
- **Helps to restore shape and symmetry of calves**
- **Creates volume** : Provides structure and volume for restoring and maintaining a healthy barrier to prevent transepidermal water loss
- **Restores skin** : Repairs soft tissue defects related to surgery and physical traumas
- **Non-surgical Body HA filler** : Provides a long-lasting non-surgical effect that is minimally invasive and scarless

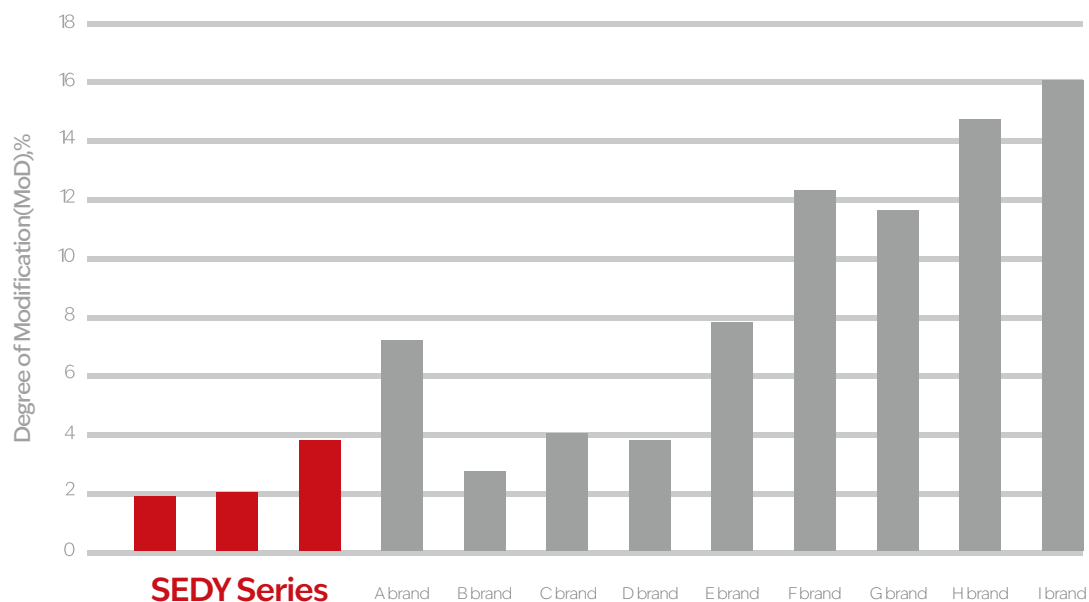

Multi-stage Cross-linking (MCL) Innovation Technology

Many products in the market claim an increased cross-linking rate. However, due to the limitations of conventional cross-linking technology, most products only actually have an increased HA concentration and particle size, compromising durability and malleability. SedyFill's HA particles are cross-linked through microbeads at three stages. This patented technology of optimal viscosity increases the gel's durability, while also making the product viscosity adjustable through the cross-linking rate resulting in customizable, high-quality fillers suitable for more diverse applications.

SEDY FILL

100mL

KAMOMIS FILL

100mL

Easy to Use

Unlike vial-type fillers, this HA body filler comes in a convenient pack, making it quick and easy to use.

Using 100% of products

With its pack-style design, this HA body filler is simple to use and lets you fully use every dose, eliminating any product waste.

Minimally invasive

This procedure is minimally invasive not like surgery. The injection of HA is carried out by using a cannula which significantly reduces pain and risk of injury.

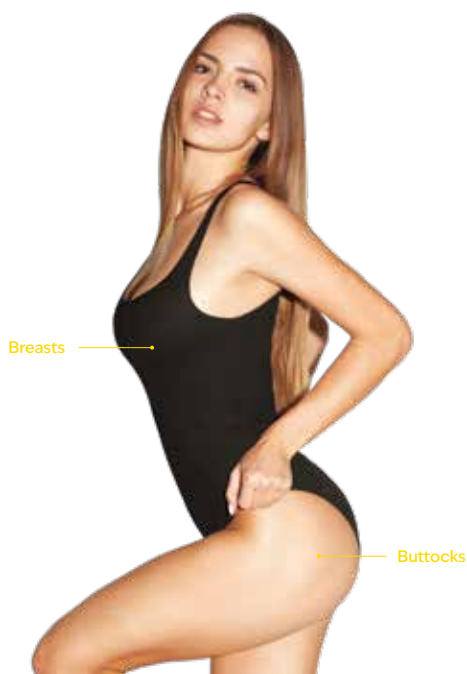

Time Saving

The body contouring procedure with it takes only about 1~2hours with only local anaesthesia. The patients can go back to normal a few hours later after the procedure. The needle marks disappear in a few days.

SEDYPOWER

Technology

Microspheres boosts body's own collagen regeneration for natural firmness.

DURABLE

Long lasting effect of 2 to 3 years.

BIODEGRADABLE

PDLLA is highly biodegradable, bio-compatible polymer that naturally decomposes into CO₂ and water.

FAST

Local anesthesia. Only 10 minutes of treatment. No internal hospitalization.

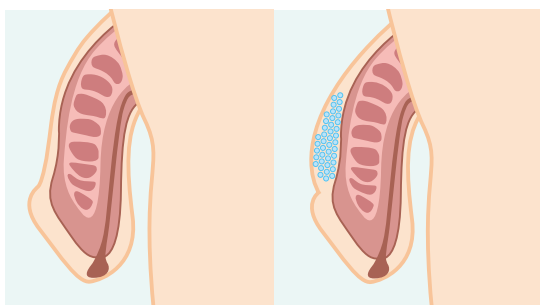

NON-INCISIONAL

Non-incisional and Non-invasive procedures. No stitch. Ideal for day surgery.

FDA

PDLLA is safe material that is registered in the U.S. FDA's GRAS (since 1984)

Before & After

Treatment Areas

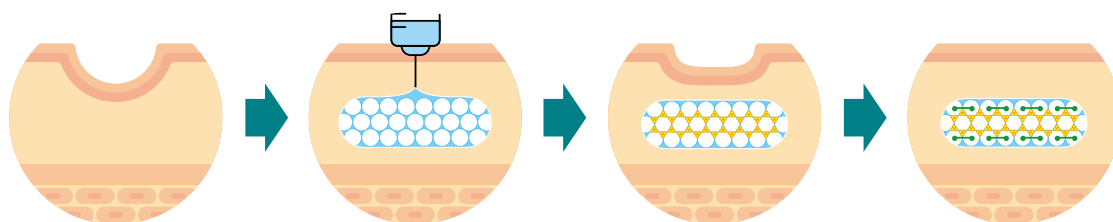

SEDYPOWER Treatment

1. Non-incisional and Non-invasive procedures
2. Effective Injection for penis enlargement
3. Only 10 minutes of treatment
4. Local anesthesia
5. Ideal for day surgery
6. No stitch out
7. No internal hospitalization required

Mechanism of SEDYPOWER

Formation of new tissues and collagen with cell inflow between PDLLA particles.

After injection into the dermis or subcutaneous layer, PDLLA microspheres provide immediate volume and gradually biodegrade while stimulating fibroblast activity. As new collagen forms around the particles, skin elasticity and volume are naturally restored, leading to long-lasting rejuvenation.

METOO FILL+ PRO

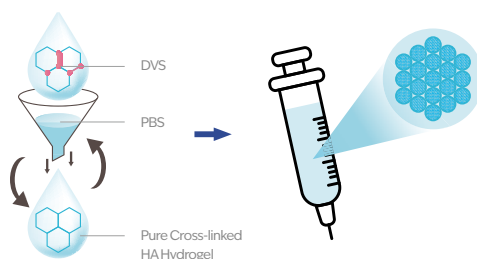

Benefits that make METOO FILL+ PRO unique

- Long-term stable volumizing effect
- Outstanding cohesion & migration resistance
- Excellent viscoelasticity
- Multi-step purification for purity over 97%
- Optimized injectability profile
- Biocompatibility & safety

Multi-degree Amphiphilic Purification

After cross-linking Metoo Fill+Pro goes through a multi-step purification process to completely neutralize the cross-linking agent using PBS solution, resulting in a network of HA chains with a purity of over 97%, as opposed to other products in the market with a purity up to 95%.

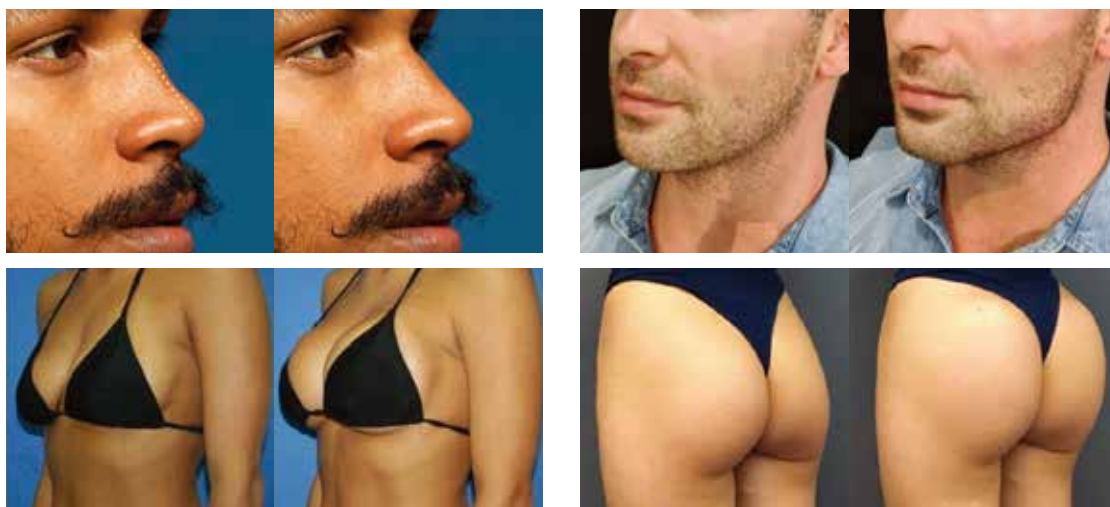

Upgraded Hyaluronic Acid Cross-linking Technology

Metoo Fill+ Biocompatibility Test Results

Test Item	Test Standard	Evaluation Criteria	Results
Cytotoxicity Test	EN ISO 10993-5	Pass	Grade 0 (Non-cytotoxic)

Main ingredients HA 20mg / mL, Lidocaine 0.3%

Duration 12 months

Package 10mL / 1 syringe / box

HYALMASS

Multi-layered Phasic Filler

Layer refers to bound polymer chains that determine the lifting capacity. Layer (bound polymer chains) has constant reversible resilience to external stress, but unbound polymer chains are irreversibly deformed once stressed. Therefore, the characteristics of the layer are the biggest factor in determining the nature of the product.

Less Swelling

Strict manufacturing control minimizes risks of adverse side effects by reducing endotoxin and BDDE levels below detection limits.

Ergonomic Design

Ergonomically designed grips and push rods provide accurate and safe treatment with constant injection forces. It allows the user to perform various injection technique according to treatment site.

Better Volume Effect and Retention

The Hy-BRID Technology can make hyaluronic acid to be highly dense and uniform sized particles. This enables Hyalmass Hyaluronic Acid to have optimal viscoelasticity and long-lasting volume.

Strict Manufacturing Control

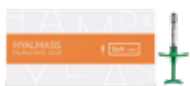

minimizes risks of adverse side effects by reducing endotoxin and BDDE levels below detection limits.

METOO FILL+

3D Cross Link Technology

Using high-precision stabilization technology, unstable HA molecules are reorganized into a uniform and durable network, resulting in superior flexibility.

Easy to modify

A natural substance that constitutes the skin of the human body. A stable, thick fluidized layer of the body that protects tissues that move with high viscosity and elasticity.

Structural Support

Supports collagen and elastin dehydration structures.

Volume Formation

Accommodates water up to 1000 times its own volume in the extracellular space.

- ✓ To prevent the passage of time and edema, the production of high-purity HA content.
- ✓ Has the advantage of **high viscoelasticity**.
- ✓ **Aseptic manufacturing environment** to prevent side effects.
- ✓ **Less than 0.1 MIU/mL Endotoxin**.
- ✓ **No residual chemical catalyst material was detected** by the complete cross-linking process
- ✓ To minimize the same PH value and osmotic pressure of the body pain

Shelf life 24 months

METOO FILL+ POINT

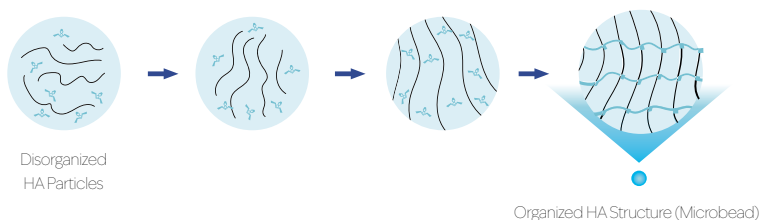

MDM Core Technology

Metoo Fill+ Point manufacturing core technology consists of three patented technologies:

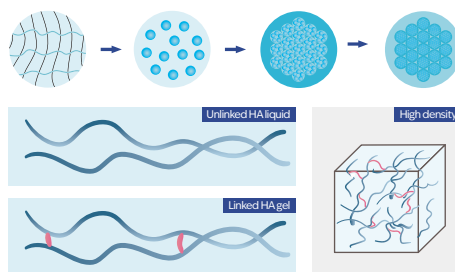

01 Product Name

This patented technology increases the gel's durability with a homogeneous structure of HA particles that provides stable volume, outstanding cohesion and migration resistance.

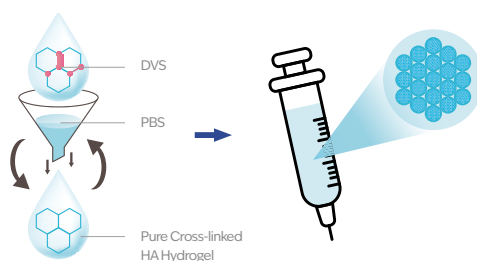

02 Multi-stage Cross-linking Technology

Organized HA Structure (Microbead) Metoo Fill+ Point goes through a three-stage high-rate DVS cross-linking process that optimizes density, provides outstanding viscoelastic properties, flexibility and an improved injectability profile while retaining the biocompatibility and physical functionality of unmodified HA.

03 Multi-degree Amphiphilic Purification

After cross-linking, Metoo Fill+ Point goes through a multi-stage purification process to completely neutralize the cross-linking agent using PBS solution, resulting in a network of HA chains with a purity of over 97%, as opposed to other products in the market with a purity up to 95%.

METOO FILL+ POINT Types

METOO Fill+ POINT LIGHT

Smallest particle size, ideal for providing hydration and natural volume to thin lines and delicate areas with thinner skin, such as the under eyes.

Glabellar folds, Oral commissures, Lips hydration, Periorbital lines, Tear trough

METOO Fill+ POINT DEEP

All-rounder filler with a medium particle size, suitable to improve average to deep wrinkles and provide natural volume to the lips, mid-face, etc.

Forehead, Nasolabial folds, Marionette lines

METOO Fill+ POINT VOLUME

Largest particle size with excellent malleability and cohesion, providing long lasting volume to the chin, jawline, nose, etc.

Nose tip, Chin volume, Nasolabial folds, Marionette lines, Mid-face

Product Specification

KAMOMIS FILL

3D Crosslink Technology

The filler first bridges the entangled and unaligned hyaluronic acid in an even and stable structure. Unlike other products, it is a product that has increased elasticity by doing the second one in a more stable form.

Kamomis Fill uses **EP hyaluronic acid, a high-purity non-animal** polymer and has added lidocaine, which is listed in the European EDQM and the U.S FDA. It has the effect of minimizing the risk of side effects and the BDDE purification process has been performed more than three times, so there is no residual BDDE. Through strict process management, it also helps minimize endotoxins.

- ✓ Safety of raw materials managed by dedicated lines
- ✓ High purity HA content for duration and anti-swelling
- ✓ High viscoelasticity that brings up the edges Uniformized particle implementation technology to complete delicate molding
- ✓ Non-detection of residual chemical catalyst through complete cross-linking process
- ✓ Aseptic manufacturing environment that prevents side effects
- ✓ Less than 0.1 EU/ml toxin protein (Endotoxin)
- ✓ Minimize pain with the same pH and osmotic pressure as the human body
- ✓ Injection pressure optimized for sophisticated process

KAMOMIS FILL Types

KAMOMIS FINE

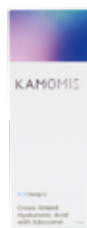

has the smallest particle size, ideal for providing hydration and natural volume to thin lines and delicate areas with thinner skin, such as the under eyes.

Glabella folds, Oral commissures, Lips hydration, Periorbital lines, Tear trough

KAMOMIS DEEP

is an all-rounder filler with a medium particle size, suitable to improve average to deep wrinkles and provide natural volume to the lips, mid-face, etc.

Forehead, Nasolabial folds, Marionette lines, Lips volume

KAMOMIS VOLUME

has the largest particle size with excellent malleability and cohesion, providing long lasting volume to the chin, jawline, nose, etc.

Nose tip, Chin tip, Jawline, Nasolabial folds, Marionette lines, Mid-face

Product Name KAMOMIS FILL (with Lidocaine 3 types)

Duration FINE: 6-12 months / DEEP: 9-12 months / VOLUME: 12-24 months

Shelf life 24 months

Before & After

High-satisfaction rate filler

A good HA filler is safer the purer it is. The MOD value is one of the factors that can cause side effects such as edema or inflammation.

Sufficient hydration

Mayfill has lowered the incidence of edema. Mayfill provides hydration, which prevents most side effects.

Safe Manufacturing Process

Manufacturing process and manufacturing environment are important for good HA fillers. MAYFILL is manufactured in a state-of-the-art cGMP level facility under aseptic conditions. Possible penetration of hazardous substances has been blocked through a without-PAUSE manufacturing process.

Easy to modify

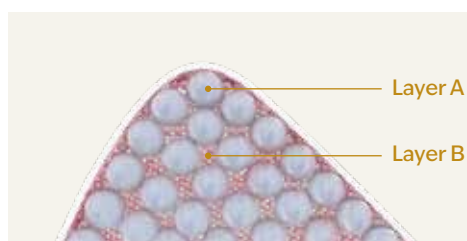

HA fillers should be easy to modify. Mayfill reacts quickly to enzymes and normalize unsatisfactory results quickly.

Mayfill's Naturalness

Layer refers to bound polymer chains that determine the lifting capacity. Layer (bound polymer chains) has constant reversible resilience to external stress, but unbound polymer chains are irreversibly deformed once stressed. Therefore, the characteristics of the layer are the biggest factor in determining the nature of the product. MAYFILL consists of a patented Multi-Layered Phasic structure.

Layer A HA Particle provides volume.

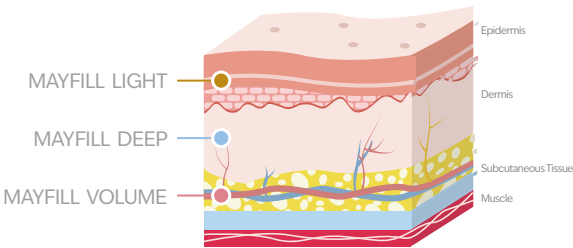

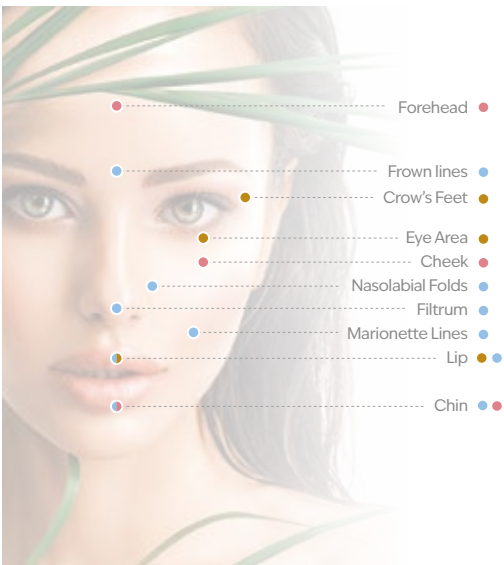

Layer B HA Gel wraps around the particle to hold it naturally and smoothly.

Multi-Layered Phasic

The combination of HA Particle and HA Gel provides good lifting and retention.

24 months

Before & After

LIP STAR

Natural-looking Results

Long-lasting Volume

Our lip filler features cross-linked HA engineered for exceptional longevity. A sophisticated multi-stage cross-linking technology creates a highly stable and resilient gel structure, enabling the filler to hold its shape and volume far longer than standard HA. The result is fewer maintenance visits and consistently plump, full lips.

Enhanced Color

Anthocyanin not only provides antioxidant benefits, but also contributes to a subtle enhancement in lip color. This natural pigment gives your lips a beautiful, healthy hue, adding to the overall appeal of the treatment.

Deep Hydration

HA is renowned for its ability to attract and retain moisture. Each molecule can hold up to 1000 times its weight in water, providing intense hydration to the lips. This not only keeps the lips looking smooth and supple, but also prevents dryness and cracking.

Antioxidant Protection

Anthocyanin, a natural antioxidant found in fruits and vegetables like blueberries and black rice, protects your lips from free radical damage caused by environmental factors such as UV radiation and pollution. This powerful antioxidant helps to maintain the integrity and health of the lip tissue.

Before & After

HA
24mg / mL

ANTHOCYANIN
1mg / mL

Function

Provides structural support and hydration

Acts as an antioxidant and natural pigment

Benefits

Long-lasting volume, improved lip texture, and deep moisturization

Protects against environmental damage, enhances natural lip color, and supports overall lip health

Product Name

LIP STAR without lidocaine

Main ingredients

HA 24mg / mL
Anthocyanin 1mg / mL

Package

1.2mL / 1 syringe / box

Duration

12-18 months

Shelf life

24 months

meNnus Fill 365mg

CE approved

Approved across European markets and manufactured according to CE-certified standards, ensuring strict compliance with safety, health, and environmental regulations.

Wrinkle improvement

meNnus Fill is a biostimulating filler designed to temporarily improve wrinkles in targeted areas of the face. It is primarily used in the nose and lip regions to smooth lines, enhance contours, and provide a natural, refreshed appearance.

Stimulates Collagen Production

One of the key benefits of PLLA is its ability to stimulate the body's natural collagen production. When injected into the skin, PLLA microspheres encourage fibroblast cells to produce new collagen, leading to improved skin elasticity and firmness over time.

Long-lasting Results

PLLA-based fillers provide gradual and long-lasting results compared to traditional hyaluronic acid fillers. As the body gradually breaks down PLLA, collagen continues to be produced, maintaining the rejuvenating effects for an extended period.

Versatility

PLLA can be used to address various cosmetic concerns, including wrinkles, facial volume loss, and skin laxity. It is commonly used in procedures such as facial rejuvenation, contouring, non-surgical facelifts, and contouring.

Biodegradable and Biocompatible

PLLA is biodegradable, meaning it eventually breaks down into harmless byproducts within the body. It is also biocompatible, meaning it is well-tolerated by the body and does not typically cause adverse reactions.

Before & After

Treatment Areas

Effects of meNnus Fill

- Skin rejuvenation
- Smooth and Glowing skin
- Elasticity
- Moisturization
- Skin tone improvement
- Healthy skin barrier

Product Specification

meNnus Fill

Main Ingredients	150mg of PLLA 90mg of CMC 125mg of Mannitol
Package	365mg / 1 vial / 15 ea/ box
Number of treatments	1 - 3 times
Effect duration	18 - 24 months
Recommended treatment area	Face & Body

Dilution Method

meNnus FILL 1vial + 7ml of sterile water+ Lidocaine 2mL

Preparation needle: 18G

Procedure needle: 21-23G

Nano-cannula

Sterile syringe 5mL

Alcohol cotton

Gauze

Gloves

meNnus 200mg

Uniform Spherical Particle Shape

that results in lower injection force than other PLA fillers.

Eco-Friendly Materials

Synthesized using monomers obtained from 100% renewable resources such as starch in corn and potatoes.

Biodegradable Materials

that are naturally and gradually degraded in the body leaving no residue.

meNnus Target

30s~50s worried about aging

People in their 40s and 50s experiencing increased wrinkles and loss of skin elasticity due to age.

People with sensitive skin

Those who are concerned about, dry and sensitive skin due to external and environmental factors.

People getting ready for a special day

People who expect skin improvement in a short time ahead of special days such as wedding, first-birthday parties, filming, etc.

People who want to restore the skin health

People who want to restore skin elasticity and improve signs of skin aging.

meNnus Plus 360mg

Faster Dilution Speed

It is biodegradable using the properties of biodegradable polymers which prevent foreign substances from reacting and has low crystalline and fusion, making it faster to decompose.

Reduced Treatment Time

thanks to freeze-drying technology through quick suspension.

Proven Safety

It is a natural substance that has been proven safe for a long time and is converted into lactic acid when decomposed.

Effects of meNnus

- Skin rejuvenation
- Smooth and Glowing skin
- Elasticity
- Moisturization
- Skin tone improvement
- Healthy skin barrier

Sterile syringe 1 - 3mL

Hyalmass CaHA+

New Generation of CaHA Filler

Calcium Hydroxyapatite + Cross linked HA

'CaHA+HA' provides new experience without side-effects of existing CaHA fillers such as initial swelling, initial volume loss and impossibility of correction.

Longer Lasting Effects

'CaHA' ensures long lasting effects rather than HA only. Initially, Cross-linked HA ensures effects and CaHA assures effect later, lastly Collagen made by CaHA confirm the effect more than 3 years.

No Initial Swelling

Existing CaHA products contains carboxymethyl cellulose, which are main components of Gel Carrier and causes initial swelling. However, 'Hyalmass CaHA+' do not need gel carrier and do not contain carboxymethyl cellulose because cross-linked HA works as gel carrier.

Synergy of CaHA + HA

Immediate correction is possible by hyaluronidase. CaHA induce your own collagen synthesis which ensure longer effects, the newly formed collagen prohibit the migration of 'Hyalmass CaHA+'.

Before & After

Treatment Areas

Recommended areas for Hyalmass CaHA+

- Nose
- Chin
- Forehead

Do not use in

- Cheek
- Lip

Injection layer

- Deep dermis

Products Comparison

Feature	HA Fillers	Calcium Fillers	Hyalmass CaHA+
Duration	1 year	3 years	3 years
Migration	Yes	No	No
Collagen stimulation	No	Yes	Yes
Elimination by hyaluronidase	Possible	Impossible	Possible
Swelling	None	Mild swelling	None
Correction	Possible	Impossible	Possible

Product Specification

Product Name	Hyalmass CaHA+
Main Ingredients	Calcium Hydroxyapatite 50% Cross-linked Hyaluronic Acid 50%
Package	1.2 mL / 1 syringe / box
Effect Duration	3 years
Shelf life	24 months

Manla Kar

Technology

Decreased antigenicity by removing 'Telopeptide' that can cause allergy using professional enzyme technology.

High Purity

Pig skin derived collagen is currently the highest purity level collagen.

Cleanness

It is naturally absorbed and metabolized into the skin tissue, leaving no residue.

Daily Life

Collagen has excellent hemostatic properties, not so much bruising after the procedure, quick recovery to the daily life.

Safety

Atelo collagen and human collagen are 99.9% similar, which provides high safety.

Durability

It supplies moisture and nutrients to the epithelial cells in the area of the epidermal layer of the skin.

Nourishment

It contains various amino acids, which provides nutrients for skin, moisturizing and whitening at the same time.

Natural Effect

It naturally biodegrades and gives natural look.

Before & After

Treatment Areas

Forehead wrinkles 1cc - 2cc / each side

Tear troughs 1cc - 2cc / each side

Dark circles 1cc / each side

Acne scars 0.2cc - 0.3cc / each side

Marionette lines 1cc / each side

Neck wrinkles 2cc / each side

Effects of Manla Kar

- Moisturization
- Pore Tightening
- Wrinkle Improvement
- Skin aging prevention
- Skin Tone-up
- Nutrition Supply
- Elasticity Improvement
- Skin Whitening

Dilution Method

For Skin Tissue Volume

No need to dilute

For Dark Circles
& Eye Wrinkles**Manla Kar + Saline Water = 1:1**Mix with 1ml saline water in the ratio of 1:1
and use 4mm microneedles.

With Skin boosters

Manla Kar + Saline Water + Skin Booster = 1:1:1Mix with 2 - 3ml saline water and skin booster product
in the ratio of 1:1:1 and use as a standard method
of using skin boosters.

Face, Neck

POLYDIO 300mg

Safe & Biodegradable

It has been verified that all components within the body decompose naturally within the initial month. Likewise, with respect to Polydio, all substances within the body degrade completely within the fifth month.

Microsphere PDO particle

PDO stands for Polydioxanone, a biocompatible and absorbable material. The surface of PDO Microsphere is smooth spherical and even particle, that are skillfully placed beneath the skin to lift, tighten, and rejuvenate the face.

Natural Collagen generation

Polydio stimulates the skin through normal metabolic processes in the body. As the fibroblasts of the irritated skin are active, it promotes regeneration of collagen and various skin tissues, improving the volume and elasticity.

Unparalleled stability

which has been confirmed through extensive research and testing spanning over 4 decades.

Surface area of one PDO microsphere: 0.00608 sq mm

Surface area of 2.6million PDO microspheres of Polydio: 15.800 sq mm

Surface area of one PDO mono thread (USP6-0 5mm): 11.0 sq mm

Similar effect to **1436 PDO mono threads**

Telo 3T : Tame FOXO

Aging Occurs in Distinct Phases

Aging is not a linear process—it occurs in distinct biological waves across the human lifespan. Scientific studies suggest that major molecular shifts happen around the mid-30s, 60s, and late 70s, each representing a critical transition in the body's aging process.

The 60s: A Key Aging Milestone

Among these stages, the changes occurring in the 60s are particularly significant. This phase involves complex transformations in immune function, cardiovascular health, and the body's natural repair systems, accelerating visible and internal signs of aging.

Key Drivers of Cellular Aging

At the core of this process are key biological regulators such as FOXO and TERT. These factors play an essential role in cellular repair, stress resistance, and the maintenance of telomeres—critical elements for preserving cellular health and longevity.

Designed to Support Aging Mechanisms

TELO 3T is designed to support the body's natural defense mechanisms against aging. By helping maintain balanced FOXO activity and supporting TERT function, it works at the cellular level to promote stability and resilience.

Protecting Cells at the Source

Through its advanced approach, TELO 3T helps maintain healthy telomeres, supports DNA protection, and reduces the accumulation of cellular damage—key contributors to the aging process.

Supporting Long-Term Cellular Longevity

More than a short-term solution, TELO 3T focuses on long-term cellular longevity, helping to preserve vitality and support healthier aging over time.

Key Ingredients

1. PQQ (Pyrroloquinoline Quinone) Powering Youth from Within

Supports cellular vitality by promoting mitochondrial biogenesis and protecting cells from oxidative stress. By helping maintain efficient energy production and supporting cellular resilience, PQQ contributes to improved skin vitality and overall cellular longevity.

2. NAD⁺ (NMN) Sustaining Cellular Longevity

Drives cellular energy and repair but declines with age. NMN helps restore NAD⁺ levels, supporting longevity pathways that maintain cellular performance and resilience over time.

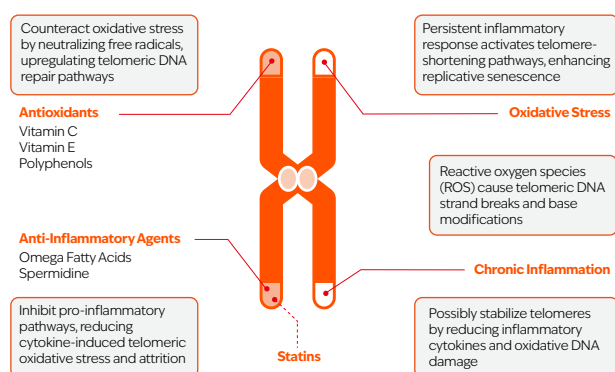

3. Vitamin C Defending Skin Vitality

Powerful antioxidant that combats aging at a cellular level, defending against oxidative stress and inflammation, while supporting firmer, brighter, and more youthful-looking skin.

4. HA Deep Hydration, Lasting Youth

Retains moisture within the skin, supporting structure, elasticity, and long-term skin vitality.

TAME THE PACE OF AGING

Aging starts at the end of our chromosomes. Telomere length is essential for DNA stability and repair, and its gradual shortening is a key indicator for aging.

Telomerase, produced by TERT, helps maintain telomere length, but its activity naturally declines over time.

Product Specification

Product Name	Telo 3T : Tame FOXO
Main Ingredients	PQQ, NAD ⁺ , Vitamin, HA
Package	3 mL / 3 vial / box
Effect Duration	3 years
Shelf life	24 months

P-Timer Volume & Brightning

Immediate and Sustaining Effect Program

· Immediate Burst Release

Freeze-dried HA beads absorb moisture and expand immediately, acting as a trigger for immediate hydration within the dermis and initial regeneration signals.

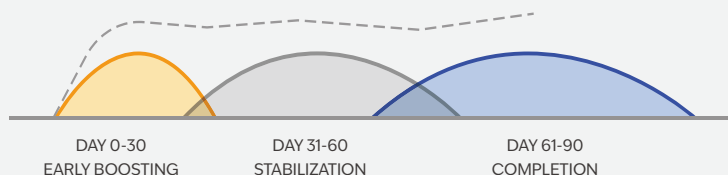

· Sustained Release

PLGA microspheres provide continuous biochemical stimulation while active ingredients are released upon program. The continuous release of lactic acid and active ingredients activates a ceaseless remodeling engine.

Multi - Step Chrono - Release Tech

90 DAY Chrono Release Profile Programmed Delivery Mechanism Eliminating Lag Phases

- Phase (MS-1)
- Phase (MS-2)
- Phase (MS-3)

A blend of PLGA microspheres enables long-lasting, programmed delivery with sustained release tailored to specific treatment functions. P-Timer Brightening is designed for 30–60 days of sustained release, while P-Timer Volume delivers precisely controlled amounts according to a programmed release cycle.

Zero-Loss Shielding Tech

Ultra-precise PLGA encapsulation maximizes bioactivity and prevents premature degradation of active ingredients, enabling controlled release at the desired time point.

P-Timer Volume

Dual-Phase P-Timer Architecture

- **External Phase of PLGA**

Lyophilized HA Bead provides immediate hydration and optimizes the dermal environment.

- **Internal Phase of PLGA**

Fast-degrading PLGA Microspheres provide a continuous biochemical stimulus, maintaining active remodeling for a full 30 days

Core Mechanism Immediate and Sustained

- **Immediate Mechanism**

Type III "Baby" Collagen binds to integrin receptors, switching the skin's regenerative system from a resting state to an active state

- **Sustained Remodeling**

Controlled hydrolysis of PLGA ensure a constant flux of rh Collagen and lactic acid from PLGA, driving high-intensity neocollagenesis for 4 weeks.

Neogenesis Collagen through Sustained Release Level of rh Collagen

- **Programmed Optimal dose for maximizing volume effect**

20mg rhCollagen release on phase 1 (Immediate) for bursting initial signaling

- **Controlled release of additional 20mg rh Collagen release during 1 month to sustain the minimum collagen production ignition level**

P-Timer Brightning

Dual-Phase P-Timer Architecture

- **External Phase of PLGA**

Lyophilized HA Bead provides immediate hydration and optimizes the dermal environment.

- **Internal Phase of PLGA**

Encapsulates high-potency Idebenone, ensuring programmed release over 30~60days.

Advantage of Micro-Encapsulation Technology

- **Stability**

Protects sensitive Idebenone from oxidation/thermal stress, preserving 100% bioactivity

- **Bioavailability**

Converts crystalline Idebenone into an amorphous state within the PLGA core, significantly enhancing solubility and skin absorption.

Immediate & Sustained

- **Immediate Effect**

Immediate moisture boosting and physical volume restoration upon treatment

- **Sustained Effect**

A 4-week continuous antioxidant shield. Unlike topical applications, it neutralizes ROS deep within the dermis in real-time

Product Specification

Product Name	P-Timer Volume	P-Timer Brightning
Main Ingredients	PLGA, HA, GHK-Cu + 20mg rh Collagen(I&III)	PLGA, HA + 100ppm Idebenone, Glutathione.
Package	5mL / box	5mL / box
Duration	1-Month Intensive Protocol	1-Month Intensive Antioxidant Protocol.
Recommended Tx	3 times, monthly upon patient skin condition	1~2 times, monthly upon patient skin condition.

NeoAqua

Long - Lasting

Polyacrylamide Hydrogel is composed of polymer chains that are highly stable in tissue and degrade very slowly, allowing the filler to last for more than 2 years.

Natural Elasticity

Due to its dynamic hydrogen-bond network, the gel structure is flexible and self-restoring, making it less rigidly bonded and more elastic than cross-linked hyaluronic acid.

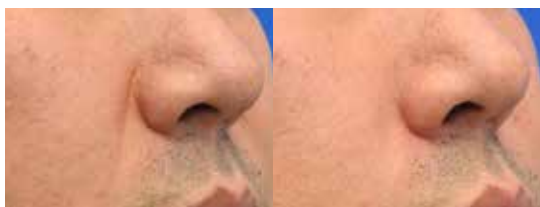

Easily Removable

Polyacrylamide hydrogel structure relies on electrostatic interactions, which allows the filler to be removed simply by saline flushing. No need for hyaluronidase or other enzymes that can trigger allergic reactions.

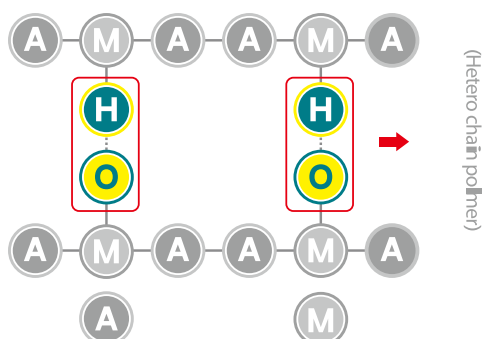

Strong Hydration

Polyacrylamide hydrogel retains up to 30% more water than Hyaluronic Acid.

Before & After

Natural Elasticity & Superior Hydration

PAHG consists of heterochain polymers linked through hydrogen bonding, forming a cohesive and stable three-dimensional network. This structure creates a resilient scaffold that maintains shape while allowing flexibility within the tissue.

Its unique molecular structure and charge distribution enhance water-binding capacity, enabling the gel to retain up to 30% more moisture than hyaluronic acid (HA). This results in improved hydration, stability, and long-lasting volumizing effects.

Treatment Areas

1.1 mL / syringe

Nasolabial folds, forehead lines, under-eye hollows

2.5 mL / syringe

Breast asymmetry correction, vaginal & penile augmentation.

Product Specification

Product Name	NeoAqua
Main Ingredients	Polyacrylamide 3.75% Sodium Chloride 96.25%
Package	2.5 mL / 1 syringe / box
Effect Duration	1.5 years
Shelf life	24 months

SKINCOLLA

Highly Body-friendly

It is highly body-friendly and does not cause allergic reactions because this Recombinant Human Collagen, patented as 'Demulcent™ Type I', is genetically identical to human collagen.

Effective and Safe

Patients can expect optimal results due to its raw ingredient being identical to human collagen, without any side effects.

Relatively Painless

Recombinant Human Collagen causes less pain during injection due to its similarity to human collagen.

No Downtime

There is no downtime after collagen injections, so you can resume normal activities immediately.

Highly Compatible

It can be safely combined with other skin treatments, such as Botox and laser resurfacing.

No Religious Aversion

There is no religious aversion to Islam.

Usage Protocol

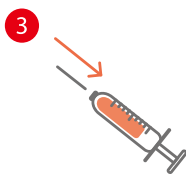

Use it with the 30G to 34G 2mm to 4mm needle or a micro-injection gun to deliver the solution into the skin.

1 Disinfect the procedure area sufficiently.

2 Local anesthesia is applied to the treatment area as needed.

3 Insert the needle into the syringe.

4 After the injection, the procedure area should be massaged to ensure that the injection liquid is uniformly distributed.

5 Periodic additional procedures are helpful.

Treatment Areas

- **Wrinkles:** Neck wrinkles (Gular suture), nasolabial folds, forehead lines, frown lines, crow's feet, and marionette lines.
- **Eyes:** Dark circle improvement, eye wrinkles, and eye bags.
- **Body:** Wrinkle care, tightening, and brightening of areas such as the hands, knees, elbows, and armpits.

2XSOME Skin Booster

1Some Exosome rejuvenating powder

A high concentration stem-cell -derived exosome lyophilized powder with Sodium Hyaluronate.

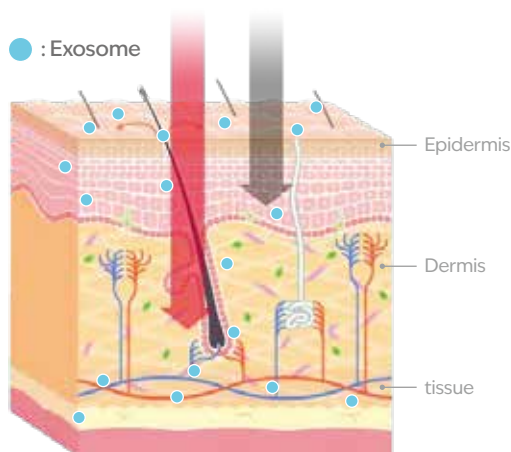

2Some Exosome activating diluent

An activating fluid with a mixture of Hydrolyzed collagen, Sodium, DNA, Copper tripeptide-1 and vitamins that works to maximize exosome absorption.

Exosome Skin Tissue Penetration

Exosome penetration power has been confirmed through testing showing penetration into the dermis.

Location tracked through DID dye

Exosome Applications

Exosomes, as a body-identical ingredient with high stability, are very unlikely to cause adverse reactions. At the same time, with their cell penetrating mechanism, they penetrate into the skin to deliver regeneration signals. It is not an irritant agent, and can be used by patients suffering from skin conditions such as acne and atopic dermatitis.

From cosmetics to cell therapy

Treatment Areas

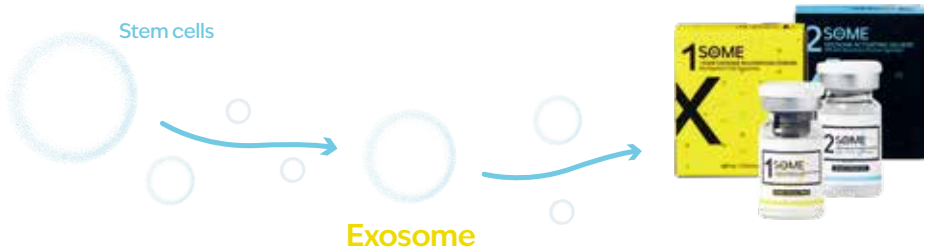

Effects of 2XSOME

- Inflammation relief
- Skin cell regeneration
- Skin elasticity recovery
- Skin hydration improvement
- Wrinkle appearance improvement
- Compromised skin barrier restoration
- Skin tone & complexion improvement

Exosome Purification Process

2Xsome has successfully isolated and purified the **0.5% of exosomes (2B cells)** from the culture solution and applied them to its skin booster formula.

Anti-inflammatory action

Exosomes have a big role in relieving inflammation, transporting the enzymes needed in the generation of extracellular Adenosine, a powerful anti-inflammatory agent which regulates immune activity and prevents skin inflammation, as well as possible post-inflammatory hyperpigmentation.

Promotion of Skin Barrier Structural components

Exosomes promote the synthesis of critical components of the skin barrier- Sphingolipids. These are essential molecules of the epidermis that intervene in the modulation of our skin cells, involved in ceramide production, keratinocyte proliferation and differentiation, maintaining the skin barrier health.

Product Specification

Product Name	2XSOME
Shelf life	36 months
Package	1 vial – 100mg / Lyophilized powder 1 vial – 6mL / diluent

HYALMASS AQUA EXOSOME

Hyaluronic Acid

Hyaluronic acid is a substance that exists in the human body, inducing cell differentiation and growth, and providing and maintaining moisture in the skin. It can hold up to 1,000 times its weight in water, making it widely used in products aimed at maintaining skin elasticity and smooth texture.

Exosome

Exosomes are nano-sized vesicles produced and secreted by cells, generated in trace amounts during the process of culturing stem cells. They contain bioactive molecules such as genetic material and proteins. In the skin, exosomes stimulate fibroblasts to promote collagen production, exhibiting excellent anti-aging and regenerative effects.

Polydeoxyribonucleotide

PDRN (Polydeoxyribonucleotide) is a DNA fragment extracted from salmon semen, which has a composition most similar to human DNA. It helps in tissue regeneration by enabling continuous production of growth factors within the body. By activating the skin's regeneration ability at the cellular level, it improves the skin environment and restores the skin structure, resulting in firmer and healthier skin.

Before & After

METOO HEALER PDRN BOOST CH

The 0.2 NANO MASH Filter Sterilization System

has been used to prevent the damage of the active components of the skin cells.

Metoo Healer PDRN BOOST CH No.10 is a new technology solution that preserves heat-sensitive vitamins and hyaluronic acids with high-tech 0.2 NANO MASH filter sterilization system instead of autoclave method which is high-pressure steam sterilization. Under high pressure conditions, saturated steam at a temperature of 120°C and pressure leads to a partial destruction of vitamin chains and converts proteins. The best combination of components and state-of-the-art technology PDRN BOOST CH No.10 can provide optimal product purification and its effectiveness.

53 Composites

- ✓ 12 Vitamins
- ✓ 23 Amino acids
- ✓ 6 Coenzymes
- ✓ 5 Nucleic acids
- ✓ 6 Minerals
- ✓ 1 Antioxidants

The best Anti-Aging Skin Revitalizer

MeToo Healer PDRN BOOST CH No. 10 is an anti-aging skin revitalizer produced during the 35 years of cell aging studies in the top anti-aging research center. The active ingredients needed to create an environment for optimal functioning of dermis fibroblasts such as vitamins, amino acids, minerals, enzymes, nucleic acids and high-molecular amounts of hyaluronic acids combine at the highest rate to stimulate the core function of the cells and activate regeneration, thus rejuvenating the skin with pigmentation, wrinkles and reduced elasticity.

Treatment Areas

Usage Protocol

Recommended to use 3 times at intervals of 3 - 5 weeks

Product Name	METOO HEALER PDRN BOOST CH
Main ingredient	12 Vitamins, 23 Amino acids, 6 Coenzymes, 5 Nucleic acids, 6 Minerals, 1 Antioxidant
Effect duration	6-8 months
Shelf life	36 months
Package	3 mL / 1 vial / 10 ea / box

RECELL

Quicker, better results

PDRN selectively binds to the A2 adenosine receptors, promoting cell and endothelial growth factor proliferation, as well as stimulating new blood vessel formation, resulting in a fast and robust regeneration of damaged tissues as well as inflammation relief.

Safe and biocompatible

PDRN is a substance already found in the human body, minimizing the possibility of any adverse reactions. Recell uses only the highest quality PDRN up to international standards.

Continuous regeneration effect

Growth factors have a very short biological half-life, resulting in a short period of activity. PDRN promotes continuous growth factor proliferation, encouraging constant regeneration.

Easier absorption

A molecular compound must be under 500kDa to allow skin absorption. With a weight of 350kDa, PDRN can easily penetrate and be absorbed into the skin to provide benefits.

Tissue regeneration and inflammation relief

Salmon DNA chains, which are most similar to human DNA, stimulate the proliferation of growth factors fibroblasts, osteoblasts, etc.

NadReju

NAD+ (Nicotinamide Adenine Dinucleotide)

NAD+ is a natural coenzyme found in all human cells and derived from Vitamin B3-related compounds. It plays a key role in converting nutrients into energy, acting as the skin cell's energy currency. As levels decline with age, replenishing NAD+ helps restore vitality, regeneration, and cellular performance.

Revive Your NAD+ Power

NAD+ levels begin to decline significantly after the age of 30. By injecting NAD+, these levels can be replenished, helping to restore the skin's youthful function and vitality.

Before & After

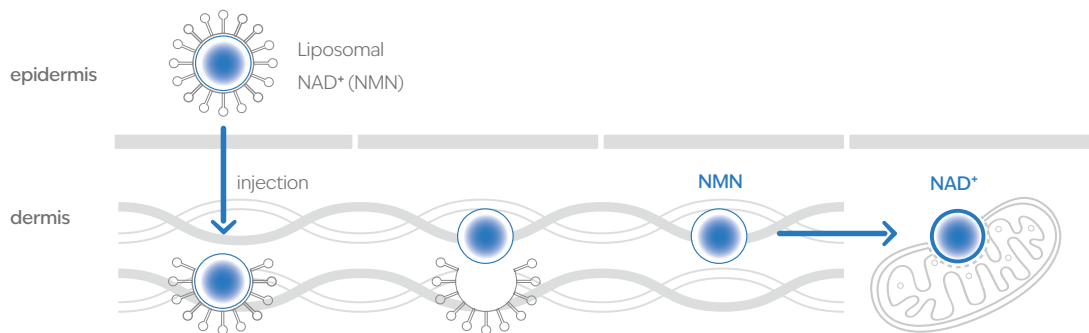

Treatment Areas

Indication

- **Wrinkles:** Neck wrinkles (Gular suture), nasolabial folds, forehead lines, frown lines, crow's feet, and marionette lines.
- **Eyes:** Dark circle improvement, eye wrinkles, and eye bags.
- **Body:** Wrinkle care, tightening, and brightening of areas such as the hands, knees, elbows, and armpits.

Liposomal NAD⁺ (NMN)

Escorting NAD⁺(NMN) to dermal target cells inside a liposome carrier ensures 100% of NAD⁺ gets safely delivered to the skin cells, amplifying energy, repair, and anti-aging benefits of NAD⁺ (NMN) compared to injection of bare NAD⁺ solutions into the skin.

Product Specification

Effect duration	8 - 12 months
Recommended treatment area	Face, Neck

NADFULL

Boosts Cellular Energy

NAD⁺ converts nutrients into ATP, energizing skin cells like fibroblasts and keratinocytes to boost collagen, renewal, and repair—leading to brighter, smoother skin.

Enhances DNA Repair

UV rays, pollution, and aging damage skin cell DNA, but NAD⁺ activates PARP enzymes to repair it, reducing mutations and preserving youthful skin.

Activates Sirtuins

Sirtuins are NAD⁺-dependent enzymes that control inflammation, oxidative stress, and collagen breakdown—so more NAD⁺ means more active sirtuins, leading to slower aging and stronger skin.

Reduces Oxidative Stress

The skin faces constant oxidative stress from UV, pollution, and more, but NAD⁺ boosts antioxidant defenses like glutathione and SOD, helping prevent collagen loss, wrinkles, and pigmentation.

Collagen & Elastin Synthesis

NAD⁺-driven energy metabolism and sirtuin activity boost collagen and elastin, resulting in firmer, tighter, and more youthful-looking skin.

Improve Skin Barrier

NAD⁺ helps maintain and restore the skin's protective barrier by energizing keratinocytes and supporting lipid synthesis, which enhances moisture retention and shields against environmental damage.

Before & After

Treatment Areas

Indication

- **Wrinkles:** Neck wrinkles (Gular suture), nasolabial folds, forehead lines, frown lines, crow's feet, and marionette lines.
- **Eyes:** Dark circle improvement, eye wrinkles, and eye bags.
- **Body:** Wrinkle care, tightening, and brightening of areas such as the hands, knees, elbows, and armpits.

Why Combine NAD⁺ & PDRN & EXOSOME

NAD⁺ enhances intracellular energy metabolism, while PDRN facilitates tissue regeneration and repair.

NAD⁺

NAD⁺ promotes cellular energy production by generating ATP

PDRN

PDRN utilizes ATP to activate regenerative and repair processes

EXOSOME

EXOSOME provides regeneration of skin, Anti-inflammatory effect and boosting skin barrier.

Product Specification

Product Name

Nadfull

Package	2.5 mL / 1 syringe / 3 ea / box
Number of treatments	1 - 3 times
Effect duration	8 - 12 months
Depth	0.8 - 1.3mm into the dermis
Technique	Micropapular, Nappage (maintain 1 cm spacing between injection points for even distribution)
Needle	33 - 34G
Amount	0.01 - 0.05 mL per spot

PINE BOTTLE OMNI

PN - Powerful Regeneration

Polynucleotides signal via adenosine A2A to reduce inflammatory cytokines, improve microcirculatory cues (e.g., VEGF), and keep fibroblasts productive. They also supply nucleotide substrate for DNA/RNA synthesis, supporting orderly tissue repair and higher-quality collagen/elastin.

PLA-Long Term Volumization

Microparticulate PLA triggers a controlled biostimulatory response that recruits and activates fibroblasts, driving neocollagenesis (types I/III) and gradual ECM remodeling. As new collagen and elastin accumulate over weeks- months, dermal density increases → progressive, natural-looking structural volume.

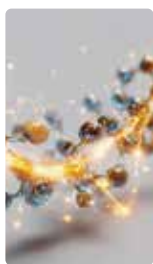

NAD⁺(NMN) - Cellular Energy

NAD⁺ (NMN) cycles to NADH and feeds Complex I in mitochondria, sustaining ATP generation for collagen synthesis and repair. It's also a substrate for sirtuins/PARPs, supporting genomic maintenance and balanced stress responses during remodeling.

HA - Immediate Hydration

Highly hydrophilic GAG, binds and retains water within the dermis, restoring turgor and optical smoothness right away. The hydrated ECM improves cell comfort and diffusion, softening fine lines while deeper remodeling gets underway.

Riboflavin - Antioxidant

Riboflavin converts to FMN/FAD, the cofactors for mitochondrial enzymes and antioxidant systems like glutathione reductase/thioredoxin reductase. By enabling these pathways, it supports redox balance and helps limit oxidative damage while new matrix forms.

Niacinamide - Brightening

Niacinamide reduces melanosome transfer from melanocytes to keratinocytes (via PAR-2 modulation) leading to more even tone. It also strengthens the barrier (↑ ceramides, ↓ TEWL) and calms irritation, lowering pigment signaling and enhancing clarity.

Treatment Areas

- **FACE:** Neck wrinkles, Forehead lines, Frown lines, Crow's feet, and Marionette lines.
- **Eyes:** Dark circle improvement, Eye wrinkles, and Eye bags.
- **Body:** Wrinkle care, Tightening, Cellulite, Stretch marks, Brightening of areas such as the hands, Knees, Elbows, and Armpits.

Preparing Solution

- STEP. 1** Remove the flip-off cap from the OMNI vial and clean the stopper with an antiseptic.
- STEP. 2** Draw 5 mL of sterile water for injections into the syringe
- STEP. 3** Introduce the needle into the vial stopper, add all sterile water, and shake for 1 minute.
- STEP. 4** Use immediately or store for up to 72 hours without refrigeration.

Product Specification

Product Name	PINEBOTTLE OMNI
Package	100mg / 1 vial / 10 ea / box
Features	Multi-ingredient skin booster combining PLA, PN, NAD+ (NMN), HA, Niacinamide, Vitamin B2 and Succinic Acid for synergistic skin renewal.
Effect duration	8 - 12 months
Recommended treatment area	Face, Eyes, Body

EYEBELLA

EYEBELLA is a high-quality PN (Polynucleotide) product specially made for eye areas reducing fine lines, wrinkles, and signs of fatigue such as dark circles, restoring lost volume.

Recovery

EYEBELLA activates self regeneration and improves skin problems like scars, wrinkles and so on.

High Elasticity

EYEBELLA recovers and improves the damaged and aged skin. It strengthens the skin barrier by filling vital components.

Safety

Polynucleotide(PN) is a safe material for human compatibility approved by the Ministry of Food and Drug Safety.

Benefits of EYEBELLA

SKIN ELASTICITY
Increases skin elasticity

SHRINK PORES
Tightening effect of enlarged pore

IMPROVEMENT OF SKIN PROBLEMS
Increase fibroblast function

SKIN MOISTURIZING
Abundant moisture supply with polymer hyaluronic acid

SKIN TONE & TEXTURE IMPROVEMENT
Improvement of skin tone and oil-water balance

Before & After

Treatment Areas

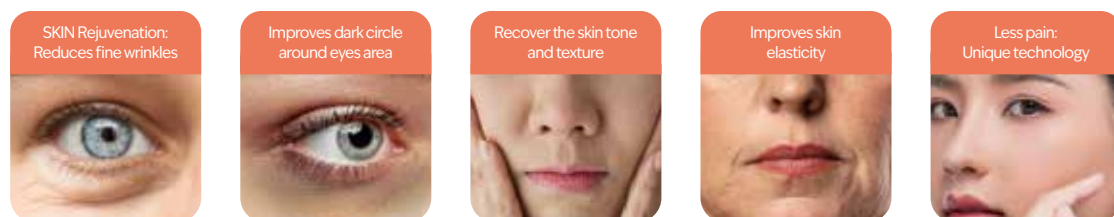

Usage Protocol

Recommended to use 3 times
at intervals of 3 - 5 weeks

Advantages

EYEBELLA makes your skin young and healthy naturally by delivering the highly bio-compatible polynucleotide directly into the skin.

STEP1

ELASTICITY

STEP2

REJUVENATION

STEP3

ANTI-AGING

Product Specification

Product Name	EYEBELLA
Main ingredient	PN 1% / mL
Effect duration	6 - 8 months
Shelf life	24 months
Package	2 mL / 1 syringe / box

HYALMASS 50

HYALMASS50

is a skin rejuvenation treatment that improves skin tone, texture, hydration and overall radiance. HYALMASS50 is an injectable anti-aging treatment made from hyaluronic acid for skin that is losing its elasticity and firmness with age.

Recovery

HYALMASS50 activates self regeneration and improves skin elasticity.

High Elasticity

HYALMASS50 recovers and improves the damaged and aged skin. It strengthens the skin barrier by filling it with premium hyaluronic acid.

Safety

Hyaluronic acid(HA) is a safe material for human compatibility approved by the Ministry of Food and Drug Safety.

2.5 - 3.0 Million Dalton

50 mg / 2ml of HA

- CPNP Approved
- Safety made as medical grade for all users
- The highest molecular weight 2.5-3.0 Million
- Dalton applied
- Exceptionally made for skin elasticity
- Lifting & Firming
- High purity No BDDE = reduced side effects

HYALMASS50 rejuvenates the skin and increases collagen and elastin production in the different layers of the skin.

Treatment Areas

2mL can be injected into 5 - 7 injection points on each side of the face.

Before & After

Usage Protocol

Recommended to use 3 times at intervals of 3 - 5 weeks

Product Specification

Product Name	HYALMASS 50
Main ingredient	HA 50mg/ 2mL
Effect duration	6-8 months
Shelf life	24 months
Package	2 mL /1 syringe / box

MAYSTER SET

PLLA | PDRN | HA

STEP 1

PDRN skin booster initiates an anti-inflammatory response to improve skin texture (including hyperpigmentation correction, pore tightening) and rejuvenates the skin through the power of salmon DNA.

- TARGET: Dark and pigmented skin
- EXPECTED EFFECT: Brightens skin tone, mitigating pigmentation

STEP 2

STEP 2

HA skin booster provides the abundance of moisture required for PDRN treatment and leads to radiant skin conditions.

- TARGET: Dry skin, which lacks both moisture and oil
- EXPECTED EFFECT: Skin moisture film formation, Cracking skin regeneration

STEP 3

PLLA skin booster provides natural volume and stimulates collagen regeneration to reduce wrinkles and restore elasticity.

- TARGET: Collagen-deficient skin
- EXPECTED EFFECT: Minimizes fine wrinkles, Regenerates skin collagen

Treatment Indications

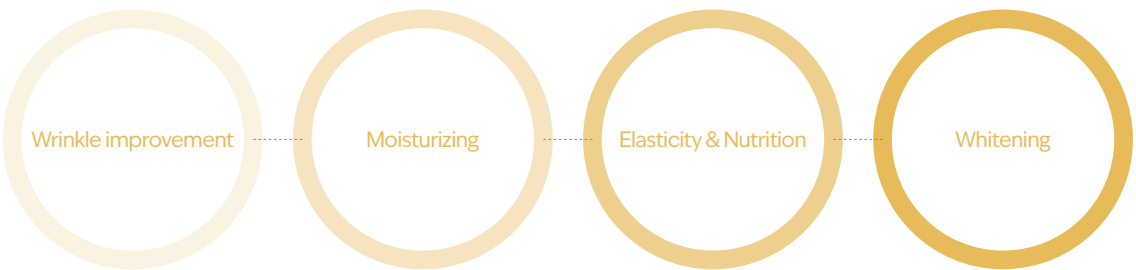

- ✓ Dry skin
- ✓ Decreased skin
- ✓ elasticity
- ✓ Wrinkles around eyes
- ✓ Dark Circles
- ✓ Skin tone improvement
- ✓ Neck wrinkles
- ✓ Acne scars
- ✓ Stretch marks

Usage Protocol

Recommended to use 3 times
at intervals of 3 - 5 weeks

Before & After

Pore Appearance Improvement

Skin Brightening

Wrinkle Appearance Improvement

Skin Dullness Improvement

HAIRNA EXOSOME HAIR FILL

Synergy Effect

200 million Human ASC-Exosomes™ + Nutrients

Copper Tripeptide-1 / Biotin / Panthenol / Biotinoyl I
Tripeptide-1 2 Key Ingredient FGF2 / SCF / Noggin /
Diaminopyrimidine Oxide(Minoxidil Alternative)
/ Aloe Vera Vesicles

Intensive Nutrition Care with Exosomes

Contains all the nutrients needed by the scalp. Helps make the scalp healthier. With the synergy between exosomes, growth factors, and active ingredients, it helps strengthen scalp barriers and prevent hair loss.

Scalp Balancing Care

After restoring balance to an unhealthy scalp, it helps improve the overall condition and maintain the results.

Gene Expression

It effectively stimulates Ki-67 protein and activates genes involved in tissue recovery, helping restore and protect damaged hair follicles while slowing scalp aging

Hair Strengthening

Biotin-13 peptides stimulate the synthesis of collagen IV and laminin5 to fix hair loss in the dermal hair follicles.

Activation of Hair Regeneration

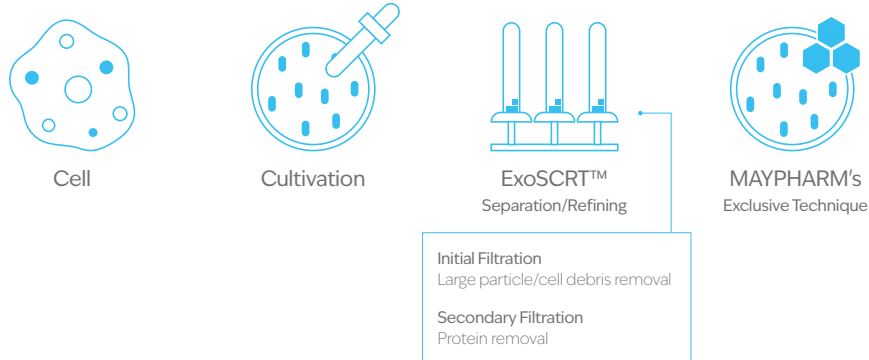

Stimulates the gene expression of dead skin cells, stimulates cell metabolism, and promotes hair production..

Before & After

MAYPHARM's Exclusive Technique

Technology for separating, purifying 0.5% exosomes in stem cell culture liquid

Product Specification

MAYPHARM's Exosome contains **598 types of miRNAs** and **1,008 proteins**. It contains 96 miRNAs + 179 proteins for skin regeneration. miRNAs are known for anti-inflammation, skin barrier maintenance, anti-aging, whitening, and cell proliferation: 56 species. miRNA: 46 species that can suppress the expression of TSLP cytokines, which play an important role in atopic dermatitis and itching.

MAYPHARM's Exclusive Technique

Standard Treatment 1 session every 2 weeks for 8 weeks [Total: 4 Session]

Intensive Treatment 1 session every 2 weeks for 8 weeks [Total: 4 Session] + 1 session every month for 3 months [up to 6 months]

Inject HAIRNA Hair Filler on the target area with 30G Needle

Injection Technique Point Injection

Injection Point every 0.2~0.3 cm *Inject 0.02~0.05 ml per point.

Product Specification

Product Name	HAIRNA hair fill
Package	2.5mL / 1 syringe / box
Number of treatments	1 - 3 times
Effect duration	8 - 12 months
Effect duration	Scalp

HAIRNA HAIR EXOSOME BOOSTER AMPOULE

HAIRNA Hair Exosome Booster Ampoule

is a functional anti-hair loss solution designed to strengthen and nourish vulnerable scalps for healthy hair growth. This product leverages ExoCoBio's proprietary patented technology to separate and refine pure exosomes.

How To Use?

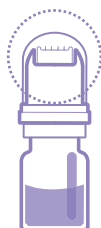

STEP 1 After shampooing, dry the scalp lightly.

STEP 3 Remove the cap in the direction of the arrow, and insert the sterilized microneedle into the ampoule.

STEP 5 After application, gently tap the remaining ampoule on the scalp to absorb it.

STEP 2 Lift the cap in the direction of the arrow shown on the cap to remove it.

STEP 4 Remove the lid of the microneedle and press on the ampoule gently so that the contents can be absorbed on the desired area of the scalp (15-20 min of use).

After use, the remaining microneedle can be disinfected with cleaning alcohol cotton and used one more time.

Microneedle exchange cycle
after the 2nd or the 3rd ampoule.

Storage method : Wash the needle once in warm water after using, disinfect it with alcohol, and store it with a cap on.

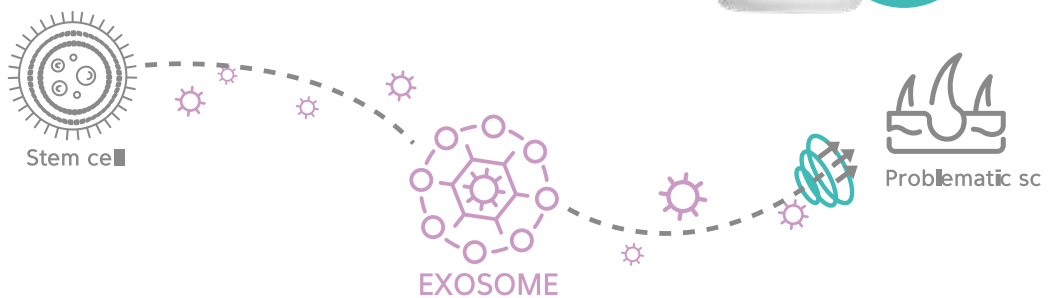

HAIRNA Hair Exosome
Booster Ampoule

Hairna's microneedle is made of stainless steel (24K gold plated). Infiltrating the scalp with Hairna Exosome Ampoule will relieve hair loss. It helps with scalp nutrition, strengthening the scalp as well as the hair.

What is EXOSOME?

It is a signal transducer between cells that the cells in our body secrete to transmit information. Pure exosomes separated and purified from stem cell culture fluid through ExoCoBio's proprietary patented technology are components that contain about 1,008 proteins and growth factors, 600 types of mRNA, and 400 types of lipids. It contains all the signals that stem cells have.

0,5% core of stem cells

Before & After

PINE BOTTLE

Enhance Skin Elasticity, Reduce Wrinkles

PINE BOTTLE enhances skin elasticity and reduces wrinkles. Unlike typical lipolysis products that can cause wrinkles during fat dissolution, our solution, combined with Riboflavin, Cyanocobalamin, and L-Carnitine, accelerates lipolysis, safely dissolving fat cells and addressing potential wrinkles.

Fat Breakdown

PINE BOTTLE features potent ingredients Lecithin, Bromelain, and Riboflavin (Vitamin B2) for effective fat breakdown. Lecithin's lipophilic tails attract and absorb fats, playing a key role, while its stimulation of lipase release aids in breaking down triglycerides into energy-providing fatty acids for the body's cells.

Lecithin

Derived from soybeans and egg yolks, lecithin effectively breaks down excess body fat into energy-usable fatty acids, promoting fat burning and diminishing the risk of fat storage in adipose tissue, addressing potential wrinkles.

Riboflavin

Riboflavin(Vitamin B2) activates fat metabolism by serving as electron carriers in energy production, antioxidant function, riboflavin helps converting nutrients into energy.

Bromelain

Bromelain has anti-inflammatory and anti-edema effects. Bromelain is a mixture of enzymes found naturally in the juice and stems of a pineapple. It helps to break down proteins and reduce inflammation.

Before & After

Treatment Areas

FACIAL TREATMENT

The face is divided, treating left and right sides along the jawline. Using 0.1-0.25mL /point, four lines are designed on each side

Total: 5mL / side

FOREARM TREATMENT

20 points on each forearm 0.5-1.0mL /point side

Total: 15-20mL / forearm

ABDOMINAL TREATMENT

1 - 2mL / point is used. The upper abdomen receives approximately 20 points centered on the navel, with 15 points on each side and 10 points on each side area

Total: 30-50mL

THIGH TREATMENT

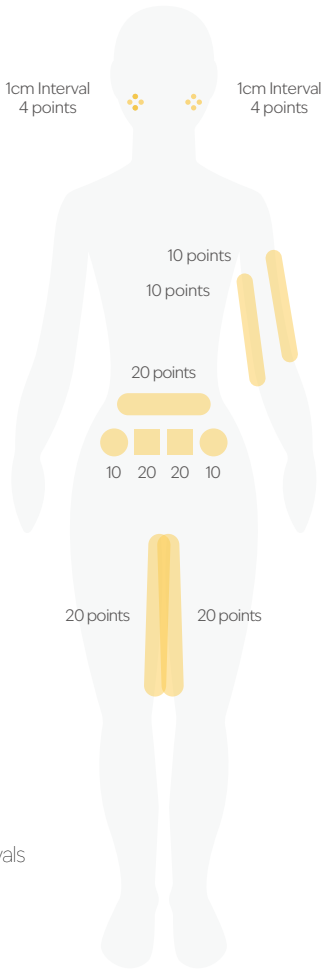

20-30 points 1-2mL /point per one thigh

Total: 10-20mL / thigh

HIP-UP TREATMENT

10-15 points 0.5-1.2mL / point at 1.5cm intervals

Total: 5-10mL /side

Treatment Areas

Recommended to use 3 times at intervals of 4 - 6 weeks
Dosage: not over 3.0mL per spot

Product Specification

Product Name	PINE BOTTLE
Main ingredient	BROMELAIN/ LECITHIN/ RIBOFLAVIN
Duration	6 - 8 months
Shelf life	36 months
Package	10 mL /1vial / 5 ea / box

SLIM POINT SOLUTION FOR FACE | FOR BODY

Bromelain

- Proteinase in pineapple
- Effect of lipolysis
- Treatment of inflammation and wound healing
- Reduced edema and pain

Lecithin

- Stimulation of lipase activity
- Emulsification and transport of triglycerides in fat cells
- Fat cell wall degradation
- Dissolving bad cholesterol in the blood, such as waste products and triglycerides clogged in blood vessels, and discharges them out of the body

Enhance Skin Elasticity, Reduce Wrinkles

The fat constituents in fat cells change the composition of the storage form so that it can be used as an energy source, thereby reducing the number of fat cells while also reducing the size of fat to maximize the reduction of fat. Dismantling fat cells and producing collagen to increase skin elasticity. It can quickly release decomposed fat cells by facilitating lymphatic circulation, making them effective in reducing edema and removing cellulite.

SEDY LINE

Venotropic Effect

Vitamin B12 is an essential nutrient that supports healthy skin and overall wellness. SEDY LINE delivers vitamin B12 to help promote smoother blood circulation and improved skin condition. When the body lacks sufficient B12, elevated homocysteine levels can damage blood vessel linings and disrupt circulation, which may reduce anti-aging benefits and slow skin recovery. In addition, vitamin B12 has strong anti-inflammatory properties that help calm acne-prone skin, making it a valuable ingredient in acne-care and sebum-control products.

Lipolytic Effect

L-carnitine is an amino acid-like compound that plays a vital role in energy metabolism. It helps transport fatty acids into the mitochondria of cells, where they can be oxidized to produce energy.

Adipocytolysis

Adipocytolysis refers to the destruction of the cell membrane by dissolution the fat cell membrane itself, causing irreversible cell destruction. Such destroyed fat cells cannot accumulate fat again, causing permanent fat volume reduction.

Centella Asiatica Extract

Centella Asiatica extract, famous for its anti-inflammatory and wound healing effects, is also a raw material that is applied as a medicine for treating venous circulation disorders. It has been proven that collagen synthesis promotes substantial improvement in venous circulation to relieve swelling and wound healing.

Juglans Regia Seed Extract

Walnut extract is rich in linolenic acid, arginine, vitamin E, and other beneficial nutrients. It supports healthy skin circulation by promoting vascular protection and improving blood flow. In addition, it helps cleanse pores and remove dead skin cells, preventing blemishes and leaving the skin smoother and more refined.

Why Sedy Line?

Improve Skin

MAYPHARM MASK PACK

Solution for Pure Skin

- ✓ Rich Moisture
- ✓ Quick absorption
- ✓ Calming effect
- ✓ Long-Lasting

Snail Secretion Filtrate

Improves skin in a variety of ways, including hydration, smoothness, and plumpness. Additionally, snail secretion filtrate can lessen the appearance of acne scars, fine lines, and wrinkles.

Why MAYPHARM Mask Pack?

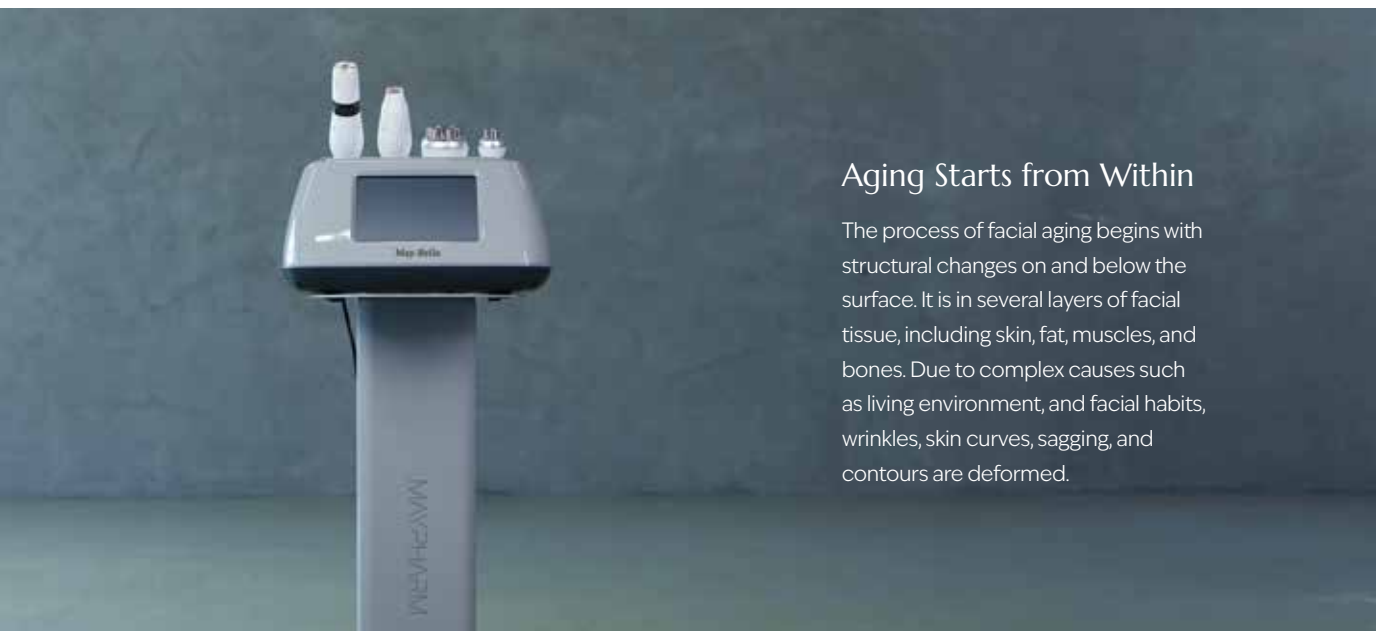

MAYPHARM Mask Pack is perfect for soothing damaged skin and overall skin rejuvenation. It boosts Collagen and Hyaluronic Acid to achieve the best results. It continuously supplies moisture and nutrition to dry and irritated skin, soothes the skin, moisturizes it, and makes it smooth and glossy.

Product Specification

Product Name	MAYPHARM MASK PACK
Main ingredient	SNAIL SECRETION FILTRATE
Shelf life	36 months
Package	23g / 1 sheet

May-Bella

Aging Starts from Within

The process of facial aging begins with structural changes on and below the surface. It is in several layers of facial tissue, including skin, fat, muscles, and bones. Due to complex causes such as living environment, and facial habits, wrinkles, skin curves, sagging, and contours are deformed.

MAY-BELLA is

a device targeting the epidermal, dermal, fascial, muscular, adipose, and cellular layers simultaneously, May-Bella achieves faster clinical outcomes and prolonged efficacy.

Components

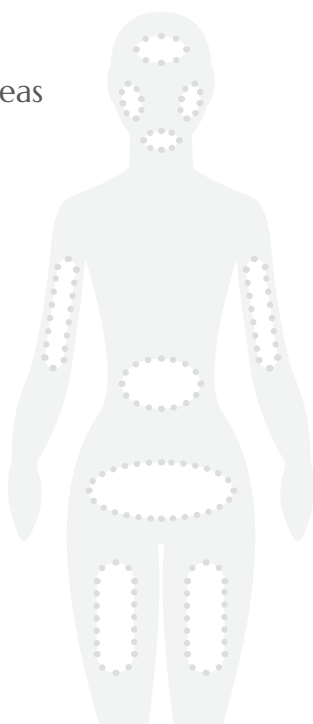

Effect

- Regeneration of epidermis and dermis (production of collagen and elastic fibers)
- Increase in the thickness of the dermis (0.2mm~0.3mm)
- Skin tightening effect (soft lifting effect)
- Reduction of wrinkles on the skin
- Improvement of skin texture (increase skin elasticity and gloss, etc.)
- Improvement of skin problems such as acne and atopy

Special & Differentiation

- Specialized in 3D design
- Honest results and depth
- Fast clinical results
- Reduction of wrinkles on the skin
- Multi device

Treatment Areas

V-Thera Catridge 3.0 / 4.5

Face lifting, jawline tightening, neck firming, forehead and cheek elasticity

Vell-Fraction Catridge 64 / 100

Acne scars, fine wrinkles, enlarged pores, pigmentation, uneven skin tone, and texture

E-MTS Available permanently

Acne scars, fine wrinkles, enlarged pores, pigmentation, uneven skin tone, and texture

Advantages

- High-end **All-in-One Lifting Device** combining HIFU, Fraxel, and E-MTS (RF+MTS+EP)
- Delivers **multiple laser modalities** in one system – no need for separate equipment.
- Provides **immediate lifting effects** with minimal pain and no anesthesia required.
- Achieves **long-lasting clinical results** through synergistic multi-layer stimulation.
- **Cost-effective** alternative to hospital-grade HIFU and RF procedures.
- Simple, non-invasive operation suitable for both **face and body treatments**.
- Compact design enabling **various treatment programs** within a single device.
