Glowy Skincare Kit

High Purified Exosome
Derived from
Human Cord Blood
Progenitor Cells

1

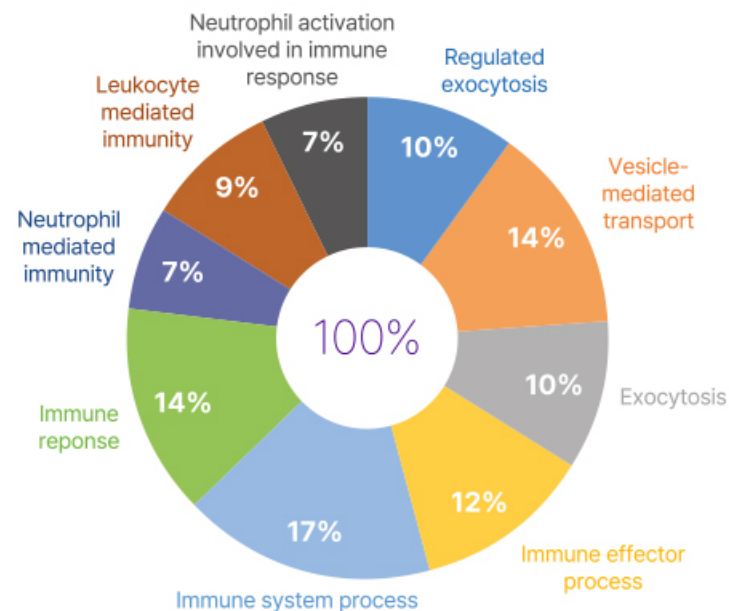

2

HA
Polynucleotide
Glutathione
Peptide for Immune Response

MAKE SURE WHAT EXOSOME IS COMPOSED OF

- + Composed of over 400 immune proteins
- + Collagen Type I - Baby Collagen
- + Collagen Type VI, Alpha 1, 2, 3 - Major Collagen for Skin Fibroblast Formation
- + Retinol-binding protein 4 - essential protein that binds to retinol and delivers to skin cell tissue
- + Helps improve pores by increasing skin cell proliferation (differentiation).
- + Retinol removes dead skin cells and increases collagen synthesis, reducing fine wrinkles and wrinkles, making your skin look healthier and more energetic.

BENEFITS OF IMMUNE EXOSOME

Antioxidant

Anti-inflammatory

Quick and Efficient
Cell Migration

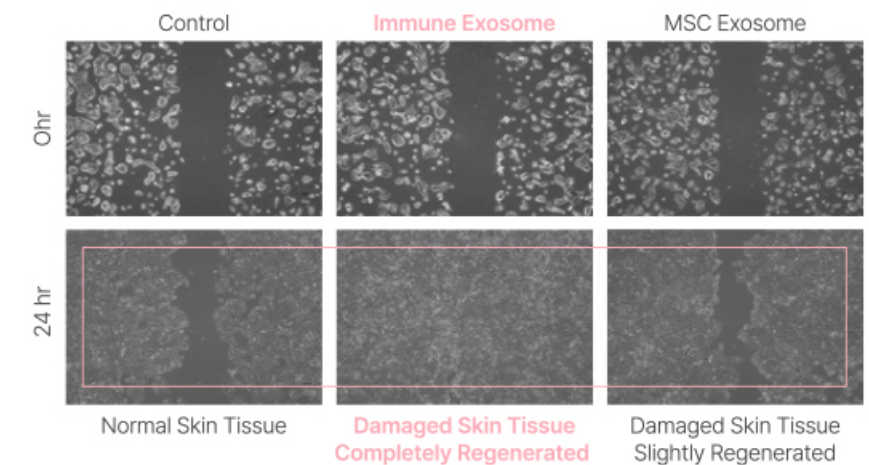

Cell Proliferation

EXOBELLE IS HIGHLY EFFECTIVE.

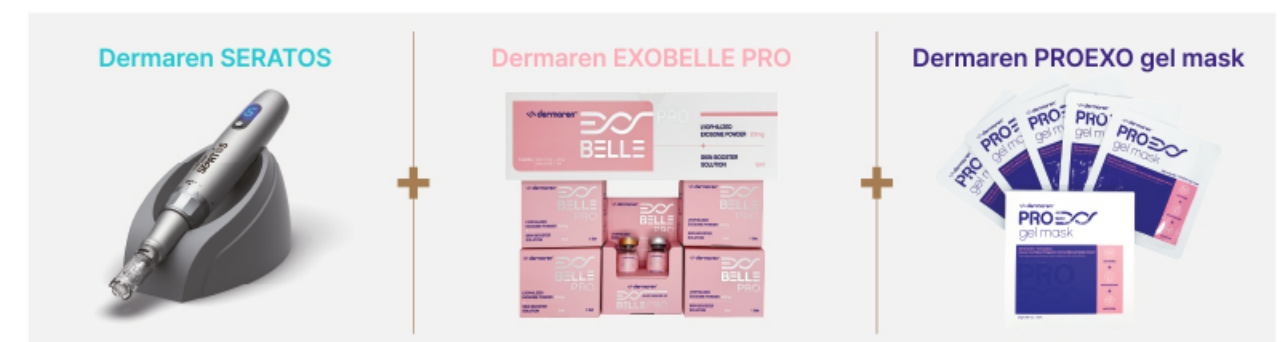

- + High Concentration of Immune Exosome produced using Progenitor Cells (neonatal umbilical cord blood)
- + It is composed over 400 immune proteins. (Collagen type I, Collagen type VI, Retinol-binding protein 4)
- + Powerful Anti-inflammation effect of Immune Exosome
- + Fast Result due to Rapid Migration of Immune Exosome to heal and regeneration of the damaged skin referring to below study
- + Cell Migration Study shows how much it heals faster and compares Immune Exosome is superior than MSC Exosome.

Based on the study,
We can simply see How Much
Exobelle has Strong Effect.

HOW TO USE EXOBELLE

Due to its Nano Particle, it still Well Absorbed without any other devices.
However, if you like to have better penetration into skin,
Pls. follow to below examples.

FUNCTIONS OF GINSENG PANAX EXTRACT

Ginseng Panax Extract boosts skin hydration, diminishes rough texture, helps fade uneven skin tone, and help visib improve wrinkles by working within skin to bolster its natural firmness.

EFFECTS OF POLYNUCLEOTIDE

- 💧 Promoting Skin Regeneration
- 💧 Reducing Fine Lines and Wrinkles
- 💧 Cell Regenerating Effects
- 💧 Contribution to Increased Hydration and Collagen Synthesis, Leaving the Skin Looking Plump, Radiant, and More Youthful.

BENEFITS OF COPPER TRIPEPTIDE-1

Wrinkle

IMPORTANCE OF GLYCOGEN FOR HAIR GROWTH

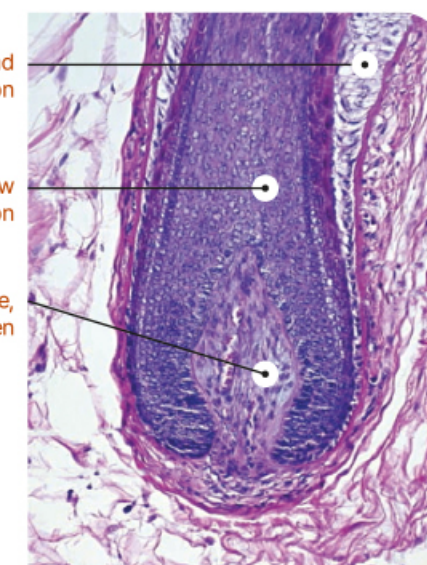

Glycogen is the main source of energy necessary for protein synthesis during the hair growth process. During this growth process, glycogen consumption is twice as fast. Therefore, the presence of glycogen in the epithelial sheath ensures the availability of energy on the active phase of hair growth.

Cortex and
Cuticle Formation

Hair Marrow
Formation

Base of Hair Follicle,
Rich in Glycogen

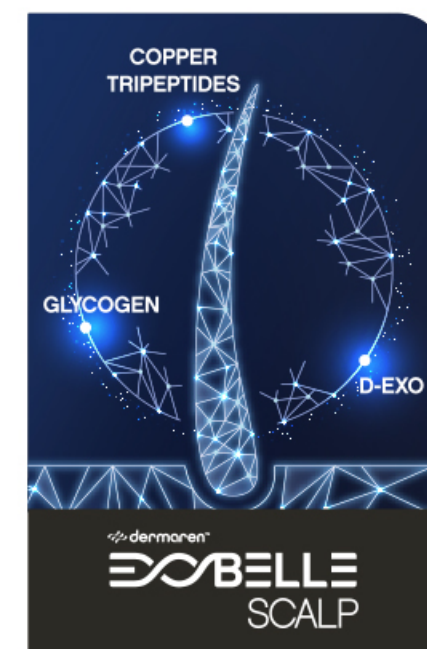

BENEFITS OF COPPER TRIPEPTIDES FOR SCALP

Copper tripeptides stimulate blood flow to the scalp. Not only do copper tripeptides help the growth of hair, they also make your existing hair thicker and fuller by increasing follicle size. Copper tripeptide can also help boost collagen and elastin, increasing the fat cells on the scalp.

* DHT: dihydrotestosterone

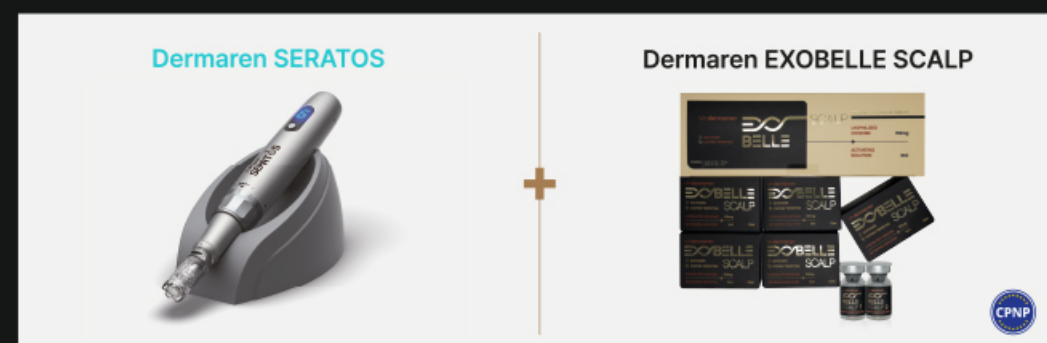

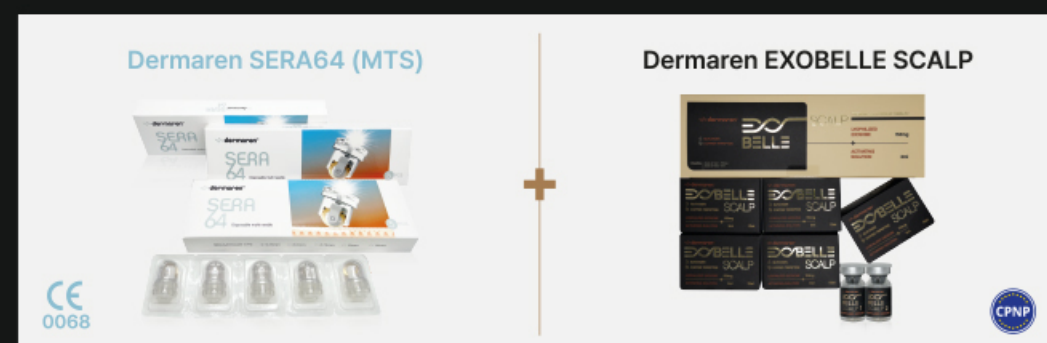

HOW TO USE EXOBELLE SCALP

Suggested Treatment Interval : Every 2-3 Weeks, but Depends on the Patient's Condition

Treatment Session : 5 times of Treatment Suggested to Improve Its Effects

ADVANTAGES OF PLANT-DERIVED EXOSOME

Plants derived extracellular vesicles (P-Evsor P-Exosome) are membranous vesicles released by plant cells. P-exosomes similar to human derived exosomes contain diverse biomolecules such as protein, lipids, RNAs, and metabolites and **have similar advantages to the human derived exosome without animal derived issue.**

TESTIMONIALS

45 years old, Woman - 1 time treatment with MTS (Sera64)
I feel my skin moisturized and shiny a lot more than before.
I don't feel dryness on my skin anymore.

DIFFERENCES BETWEEN BIO-GEL MASK VS HYDROGEL MASK

Bio-Gel Mask

Made of Its Condensed
Essence by Compounding
All Active Ingredients

Long-lasting Cooling Effect by
Air Circulation

Free from Chemical Materials

Non Flowing Essence

Hydro-Gel Mask

Putting Its Essence
Separately into Gel Mask

Cooling Effects
decrease gradually.

Chemical Material Used
to Keep its Mask Shape

Essence is all over and
makes messy around
when applying the mask
on the face.

BIO-GEL PRODUCTION PROCESS

Bio-Gel Mask is friendly in use without fluid essence!

No Need to
have process
for Essence
Filling

Compounding

Gelating

Pressing

PLT EXOSOME
SKIN BOOST
MASKPACK

SOOTHING
HYDRATING

THIS NUTRIENT-RICH MASK PACK HELPS ENHANCING THE SKIN ELASTICITY.
NOT ONLY IT SOOTHES YOUR TIRED AND AGED SKIN WITH ITS FRESHNESS.
BUT MAKES YOUR SKIN MOISTURIZED & HEALTHY
BY CALMING THE SKIN TROUBLES FROM ITS EXCELLENT MOISTURIZING POWER.

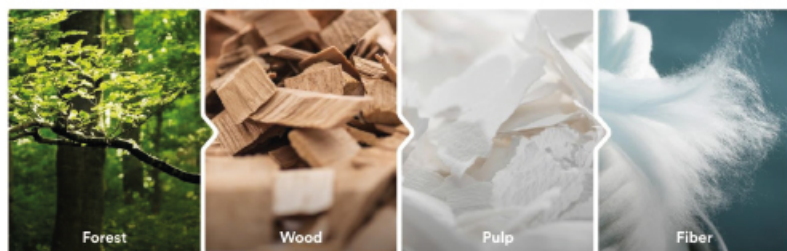

MAIN ACTIVE INGREDIENTS

			
EUPHORBIA SUPINA STEM EXTRACT (Exosome)	Oligo-HA	SP1-FGF2 (FIBROBLAST GROWTH FACTOR 2)	SP1-FGF1 (FIBROBLAST GROWTH FACTOR 1)
			
WATER LOTUS EXTRACT	RICE EXTRACT	ARTEMISIA ANNUA EXTRACT	PEARL EXTRACT

MAIN FUNCTIONS

			
IMPROVE SKIN TONE	IMPROVE SKIN TEXTURE	IMPROVE SKIN ELASTICITY	IMPROVE SKIN REGENERATION
			
WHITENING	INCREASE MOISTURE	ENHANCE SKIN PENETRATION	

STRONG POINTS OF LUMI GLOW MASK PACK

- Natural Pulp Extracted Cellulose Sheet**

- Excellent Adhesion**
 It is more hygroscopic than cotton and rayon,
and the adhesion to the skin is excellent when you have makeup water.
- Optimization of Water Absorption**
 Unique microfiber tissue composed of extremely thin fibrous tissues

- Skin-Friendly Fiber**
 Tencel skin is made up of extremely thin size and consistent arrangement of tissues.

- Clean & Safe Product**
 Tencel skin is made up of extremely thin size and consistent arrangement of tissues.
