## FAQs

### Can I use it on a client with a fish allergy?

We would not recommend **dermaren Lumi eyes** to anyone with a fish & shellfish allergy due to the Salmon DNA ingredient.

### How long does it take to see results?

With **dermaren Lumi eyes**, you can achieve a flawless outcome in just one session. For optimal results, it is advised to undergo a set of three treatments, spaced four weeks apart.

### Are there any side effects?

Clients may experience swelling post-procedure. This is perfectly normal both due to the penetration of the treatment area the skin puffiness should subside within 7-14 days post-treatment.
