

Cellular Regeneration
Beyond Repair.

Belluxi Return20
NAD LYCO

NAD+ LYCO SKIN BOOSTER

Cellular Energy Boost

Replenishes depleted NAD+ to restore mitochondrial function and revitalize aging skin cells at their core.

Targeted Regeneration

Utilizes highly purified exosomes as intelligent messengers to deliver active ingredients directly to damaged tissues.

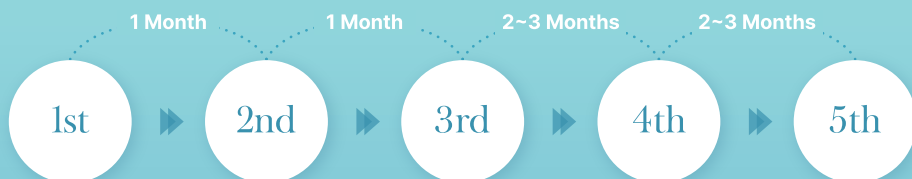

Structural Rejuvenation

Maximizes collagen and elastin synthesis to reduce fine lines, improve density, and restore youthful elasticity.

Barrier Restoration

Provides profound soothing benefits, rapidly repairing the skin barrier while ensuring high clinical safety.

Protocol

Application Methods

NAD LYCO is compatible with **Potenza (RF Microneedling), Injection, and Beauty Devices**, enabling customized skin revitalization across various aesthetic treatment modalities.

• Preparation

After cleansing, mix the Exosome powder with the NAD+ activator and dissolve completely.

• Treatment

Apply the solution evenly across the face using MTS (Microneedling) or Beauty devices to maximize deep penetration.

• Finishing

Apply a soothing mask or use LED light therapy to calm the skin and lock in the active ingredients.

* For optimal results, an initial course of 2~3 sessions at 1-month intervals is recommended, followed by maintenance treatments every 2~3 months.

Classification	Cosmetics
Packaging unit	5mL x 1 vial/box
Origin	South Korea
Storage method	Store at below 30°C, away from sunlight
Efficacy and effect	Intensive skin repair and texture refinement through deep cellular renewal.
